The Trust

Each of the Acclivity Small Cap Value Fund, the Acclivity Small Cap Growth Fund, and the Acclivity Mid Cap Multi-Style Fund (each a “Fund,” and together the “Funds”) is a series of Northern Lights Fund Trust II, a Delaware statutory trust (the “Trust”) organized on August 26, 2010.

The Trust is registered as an open-end management investment company. The Trust is governed by its Board of Trustees (the “Board” or “Trustees”). The Funds may issue an unlimited number of shares of beneficial interest. All shares of the Funds have equal rights and privileges. Each share of a Fund is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of a Fund is entitled to participate equally with other shares (i) in dividends and distributions declared by a Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of a Fund are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share.

Each Fund is a diversified series of the Trust. The Funds’ investment objectives, restrictions and policies are more fully described here and in the Prospectus. The Board may add classes to and reclassify the shares of the Funds, start other series and offer shares of a new fund under the Trust at any time.

Each Fund offers two classes of shares: Class N and Class I shares. Each share class represents an interest in the same assets of each Fund, has the same rights and is identical in all material respects except that (i) each class of shares may be subject to different (or no) sales loads, (ii) each class of shares may bear different (or no) distribution fees; (iii) each class of shares may have different shareholder features, such as minimum investment amounts; (iv) certain other class-specific expenses will be borne solely by the class to which such expenses are attributable, including transfer agent fees attributable to a specific class of shares, printing and postage expenses related to preparing and distributing materials to current shareholders of a specific class, registration fees paid by a specific class of shares, the expenses of administrative personnel and services required to support the shareholders of a specific class, litigation or other legal expenses relating to a class of shares, Trustees’ fees or expenses paid as a result of issues relating to a specific class of shares and accounting fees and expenses relating to a specific class of shares and (v) each class has exclusive voting rights with respect to matters relating to its own distribution arrangements. Each share of the Funds is entitled to one vote on all matters as to which shares are entitled to vote. In addition, each share of the Funds is entitled to participate equally with other shares on a class-specific basis (i) in dividends and distributions declared by a Fund and (ii) on liquidation to its proportionate share of the assets remaining after satisfaction of outstanding liabilities. Shares of a Fund are fully paid, non-assessable and fully transferable when issued and have no pre-emptive, conversion or exchange rights. Fractional shares have proportionately the same rights, including voting rights, as are provided for a full share. Currently only the Acclivity Mid Cap Multi-Style Fund and the Acclivity Small Cap Value Fund are available for purchase.

The Trust’s Agreement and Declaration of Trust - General

Under the Trust’s Agreement and Declaration of Trust, each Trustee will continue in office until the termination of the Trust or his/her earlier death, incapacity, resignation or removal. Shareholders can remove a Trustee to the extent provided by the Investment Company Act of 1940, as amended (the “1940 Act”) and the rules and regulations promulgated thereunder. Vacancies may be filled by a majority of the remaining Trustees, except insofar as the 1940 Act may require the election by shareholders. As a result, normally no annual or regular meetings of shareholders will be held unless matters arise requiring a vote of shareholders under the Agreement and Declaration of Trust or the 1940 Act.

The Trust is not required to and does not intend to hold annual meetings of shareholders.

The Trust’s Agreement and Declaration of Trust – Shareholder Derivative Actions

A shareholder may bring derivative action on behalf of the Trust only if the shareholder or shareholders first make a pre-suit demand upon the Trustees to bring the subject action unless an effort to cause the Trustees to bring such action is excused. A demand on the Trustees shall only be excused if a majority of the Board of Trustees, or a majority of any committee established by the Board to consider the merits of such action, has a personal financial interest in the action at issue.

Innealta Capital, LLC (the “Adviser”) serves as the investment adviser to each Fund.

Investment Policies, Strategies and Associated Risks

The investment objective of the Acclivity Small Cap Value Fund is to seek long-term capital appreciation. The investment objective of the Acclivity Small Cap Growth Fund is to seek long-term capital appreciation. The investment objective of the Acclivity Mid Cap Multi-Style Fund is to seek long-term capital appreciation. The investment objectives of the Funds and the descriptions of each Fund’s principal investment strategies are set forth under “Investment Strategies, Related Risks and Disclosure of Portfolio Holdings” in the Prospectus. Each Fund’s investment objective is not fundamental and may be changed without the approval of a majority of the outstanding voting securities of the Trust, although a Fund will provide shareholders with notice of any change to a Fund’s investment objectives at least 60 days prior to such change.

The following pages contain more detailed information about the types of instruments in which the Funds may invest, strategies the Adviser may employ in pursuit of each Fund’s investment objective and a summary of related risks.

Equity Securities

The Funds may invest in equity securities consistent with their investment objective and strategies. Common stocks, preferred stocks and convertible securities are examples of equity securities in which the Funds may invest.

All investments in equity securities are subject to market risks that may cause their prices to fall. Historically, the equity markets have moved in cycles and the value of the securities in the Funds’ portfolio may fluctuate substantially from day to day. Owning an equity security can also subject the Funds to the risk that the issuer may discontinue paying dividends. Other risks of investing globally in equity securities may include changes in currency exchange rates, exchange control regulations, expropriation of assets or nationalization, imposition of taxes including withholding taxes on dividend or interest payments, and difficulty in obtaining and enforcing judgments against entities. Equities investments may involve substantial risks and may be subject to wide and sudden fluctuations in market value, with a resulting fluctuation in the amount of profits and losses. There are no absolute restrictions in regard to the size or operating experience of the companies in which the Funds may invest directly or indirectly. In addition, relatively small companies in which the Funds may invest may lack management depth or the ability to generate internally, or obtain externally, the funds necessary for growth and companies with new products or services could sustain significant losses if projected markets do not materialize.

To the extent the Funds invest in the equity securities of small- and medium-sized companies, they will be exposed to the risks of small- and medium-sized companies. Such companies often have narrower markets for their goods and/or services and more limited managerial and financial resources than larger, more established companies. Furthermore, those companies often have limited product lines, or services, markets, or financial resources, or are dependent on a small management group. In addition, because these

stocks are not well-known to the investing public, do not have significant institutional ownership, and are followed by relatively few security analysts, there will normally be less publicly available information concerning these securities compared to what is available for the securities of larger companies. Adverse publicity and investor perceptions, whether based on fundamental analysis, can decrease the value and liquidity of securities held by the Funds. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of each Fund's portfolio.

Common Stock

A common stock represents a proportionate share of the ownership of a company and its value is based on the success of the company's business, any income paid to stockholders, the value of its assets, and general market conditions. In addition to the general risks set forth above, investments in common stocks are subject to the risk that in the event a company in which a Fund invests is liquidated, the holders of preferred stock and creditors of that company will be paid in full before any payments are made to a Fund as a holder of common stock. It is possible that all assets of that company will be exhausted before any payments are made to each Fund.

Preferred Stock

Preferred stocks are equity securities that often pay dividends at a specific rate and have a preference over common stocks in dividend payments and liquidation of assets. A preferred stock has a blend of the characteristics of a bond and common stock. It can offer the higher yield of a bond and has priority over common stock in equity ownership, but does not have the seniority of a bond and, unlike common stock, its participation in the issuer's growth may be limited. Although the dividend is set at a fixed annual rate, in some circumstances it can be changed or omitted by the issuer.

Rights and Warrants

Each Fund may invest in rights or warrants. Rights and warrants entitle the holder to buy equity securities at a specific price for a specific period of time. Rights and warrants may be considered more speculative than certain other types of investments in that they do not entitle a holder to dividends or voting rights with respect to the underlying securities that may be purchased nor do they represent any rights in the assets of the issuing company. Also, the value of a right or warrant does not necessarily change with the value of the underlying securities and a right or warrant ceases to have value if it is not exercised prior to the expiration date.

Convertible Securities

Each Fund may invest in convertible securities. Convertible securities (such as debt securities or preferred stock) may be converted into or exchanged for a prescribed amount of common stock of the same or different issuer within a particular period of time at a specified price or formula. A convertible security entitles the holder to receive interest paid or accrued on debt or dividends paid on preferred stock until the convertible stock matures or is redeemed, converted or exchanged. While no securities investment is without some risk, investments in convertible securities generally entail less risk than the issuer's common stock. However, the extent to which such risk is reduced depends in large measure upon the degree to which the convertible security sells above its value as a fixed income security. In addition to the general risk associated with equity securities discussed above, the market value of convertible securities is also affected by prevailing interest rates, the credit quality of the issuer and any call provisions. While convertible securities generally offer lower interest or dividend yields than nonconvertible debt securities of similar quality, they do enable the investor to benefit from any increases in the market price of the underlying common stock.

Other Investment Companies

Each Fund may invest in shares of other registered investment companies, including money market mutual funds, in accordance with the limitations established under the 1940 Act. Investments in the securities of other investment companies may involve duplication of advisory fees and certain other expenses. By investing in another investment company, each Fund becomes a shareholder of that investment company. As a result, each Fund shareholders indirectly will bear the Fund's proportionate share of the fees and expenses paid by shareholders of the other investment company, in addition to the fees and expenses each Fund shareholders directly bear in connection with the Fund's own operations.

Each Fund currently intends to limit its investments in securities issued by other investment companies so that not more than 3% of the outstanding voting stock of any one investment company (other than money market funds) will be owned by each Fund, or its affiliated persons, as a whole. In addition to the advisory and operational fees each Fund bears directly in connection with its own operation, each Fund would also bear its pro rata portions of each other investment company's advisory and operational expenses.

Section 12(d)(1) of the 1940 Act restricts investments by registered investment companies in securities of other registered investment companies. The acquisition of shares by each Fund in other registered investment companies is therefore subject to the restrictions of Section 12(d)(1) of the 1940 Act, except as may be permitted by Rule and/or an exemptive order obtained by the other registered investment companies that permits each Fund to invest in the other registered investment companies beyond the limits of Section 12(d)(1), subject to certain terms and conditions, including that each Fund enter into an agreement with the other registered investment companies regarding the terms of the investment.

In accordance with Section 12(d)(1)(F) and Rule 12d1-3 of the 1940 Act, the provisions of Section 12(d)(1) shall not apply to securities purchased or otherwise acquired by each Fund if (i) immediately after such purchase or acquisition not more than 3% of the total outstanding stock of such registered investment company is owned by each Fund and all affiliated persons of the Fund; and (ii) the Fund is not proposing to offer or sell any security issued by it through a principal underwriter or otherwise at a public or offering price including a sales load that exceeds the limits set forth in Rule 2341 of the Conduct Rules of the Financial Industry Regulatory Authority ("FINRA") applicable to a fund of funds (*i.e.*, 8.5%).

Exchange-Traded Funds

Each Fund may invest in Exchange-Traded Funds ("ETFs"). ETFs are typically open-end investment companies that are bought and sold on a national securities exchange. An ETF is similar to a traditional mutual fund, but trades at different prices during the day on a security exchange like a stock. Similar to investments in other investment companies discussed above, each Fund's investments in ETFs will involve duplication of advisory fees and other expenses since the Fund will be investing in another investment company. In addition, each Fund's investment in ETFs is also subject to its limitations on investments in investment companies discussed above, absent another applicable exemption. To the extent each Fund invests in ETFs which focus on a particular market segment or industry, the Fund will also be subject to the risks associated with investing in those sectors or industries. The shares of the ETFs in which each Fund will invest will be listed on a national securities exchange and the Fund will purchase or sell these shares on the secondary market at its current market price, which may be more or less than its net asset value per share ("NAV"). Investors in each Fund should be aware that ETFs are subject to "tracking risk," which is the risk that an ETF will not be able to replicate exactly the performance of the index it tracks.

As a purchaser of ETF shares on the secondary market, each Fund will be subject to the market risk associated with owning any security whose value is based on market price. ETF shares historically have

tended to trade at or near their NAV, but there is no guarantee that they will continue to do so. Unlike traditional mutual funds, shares of an ETF may be purchased and redeemed directly from the ETFs only in large blocks (typically, 50,000 shares or more) and only through participating organizations that have entered into contractual agreements with the ETF. The Funds do not expect to enter into such agreements and therefore will not be able to purchase and redeem their ETF shares directly from the ETF.

Money Market Mutual Funds

Each Fund may invest in money market mutual funds in connection with its management of daily cash positions or for temporary defensive purposes. Money market mutual funds are regulated investment companies under the 1940 Act and each Fund will invest in money market funds in accordance with applicable rules and regulations with respect to investments in other investment companies. Please note that in addition to the advisory and operational fees each Fund pays in connection with its own operations, to the extent each Fund invests in money market funds, the Fund will also bear its pro rata portion of each such money market fund's fees and expenses.

Illiquid Securities

Each Fund may not invest more than 15% of the value of its net assets in illiquid securities. The Adviser will monitor the amount of illiquid securities in each Fund's portfolio, under the supervision of the Board, to ensure compliance with this investment restriction.

Historically, illiquid securities have included securities subject to contractual or legal restrictions on resale because they have not been registered under the Securities Act of 1933, as amended (the "Securities Act"), securities which are otherwise not readily marketable and repurchase agreements having a maturity of longer than seven days. Mutual funds do not typically hold a significant amount of these restricted or other illiquid securities because of the potential for delays on resale and uncertainty in valuation. Limitations on resale may have an adverse effect on the marketability of portfolio securities, and the Funds might be unable to sell illiquid securities promptly or at reasonable prices and might thereby experience difficulty satisfying redemption requests within seven days.

Fixed Income Securities

General

Each Fund may invest in fixed income securities. Examples of such securities are described below.

Indexed Securities

Each Fund may purchase securities whose prices are indexed to the prices of other securities, securities indices, currencies, precious metals or other commodities, or other financial indicators. Indexed securities typically, but not always, are debt securities or deposits whose value at maturity or coupon rate is determined by reference to a specific instrument or statistic. Gold-indexed securities, for example, typically provide for a maturity value that depends on the price of gold, resulting in a security whose price tends to rise and fall together with gold prices. Currency-indexed securities typically are short-term to intermediate-term debt securities whose maturity values or interest rates are determined by reference to the values of one or more specified foreign currencies, and may offer higher yields than U.S. dollar-denominated securities of equivalent issuers. Currency-indexed securities may be positively or negatively indexed; that is, their maturity value may increase when the specified currency value increases, resulting in a security that performs similarly to a foreign-denominated instrument, or their maturity value may decline when foreign currencies increase, resulting in a security whose price characteristics are similar to a put on the underlying

currency. Currency-indexed securities may also have prices that depend on the value of a number of different foreign currencies relative to each other.

The performance of indexed securities depends to a great extent on the performance of the security, currency, or other instrument to which they are indexed, and may also be influenced by interest rate changes in the United States and abroad. At the same time, indexed securities are subject to the credit risks associated with the issuer of the security, and their values may decline substantially if the issuer's creditworthiness deteriorates. Recent issuers of indexed securities have included banks, corporations, and certain U.S. government agencies. Indexed securities may be more volatile than the underlying instruments.

Real Estate-Related Investments

Real estate-related instruments include real estate investment trusts, commercial and residential mortgage-backed securities, and real estate financings. Real estate-related instruments are sensitive to factors such as real estate values, property taxes, interest rates, cash flow of underlying real estate assets, overbuilding, and the management skill and creditworthiness of the issuer. Real estate-related instruments may also be affected by tax and regulatory requirements, such as those relating to the environment.

Initial Public Offerings

Each Fund may purchase shares in initial public offerings ("IPOs"). Because IPO shares frequently are volatile in price, each Fund may hold IPO shares for a very short period of time. This may increase the turnover of the Fund's portfolio and may lead to increased expenses to the Fund, such as brokerage commissions and transaction costs. By selling shares, a Fund may realize taxable capital gains that it will subsequently distribute to shareholders. Investing in IPOs increases risk because IPO shares are frequently volatile in price. As a result, their performance can be more volatile and they face greater risk of business failure, which could increase the volatility of each Fund's portfolio.

Borrowing

Each Fund may borrow money for investment purposes. The Funds' Investment Restriction regarding borrowing will be interpreted to permit the Funds to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act.

Each Fund may borrow money in amounts of up to one-third of its total assets (including the amount borrowed) from banks. In addition, each Fund is authorized to borrow money from time to time for temporary, extraordinary or emergency purposes or for clearance of transactions. The use of borrowing by each Fund involves special risk considerations that may not be associated with other funds having similar objectives and policies. Since substantially all of the Funds' assets fluctuate in value, while the interest obligation resulting from a borrowing will be fixed by the terms of each Fund's agreement with its lender, the NAV per share of each Fund will tend to increase more when its portfolio securities increase in value and to decrease more when its portfolio assets decrease in value than would otherwise be the case if the Fund did not borrow funds. In addition, interest costs on borrowings may fluctuate with changing market rates of interest and may partially offset or exceed the return earned on borrowed funds. Under adverse market conditions, each Fund might have to sell portfolio securities to meet interest or principal payments at a time when fundamental investment considerations would not favor such sales.

The 1940 Act permits a portfolio to borrow money in amounts of up to one-third of each Fund's total assets from banks for any purpose, and to borrow up to 5% of each Fund's total assets from banks or other lenders for temporary purposes. To limit the risks attendant to borrowing, the 1940 Act requires each Fund to maintain at all times an "asset coverage" of at least 300% of the amount of its borrowings. Asset coverage means the ratio that the value of each Fund's total assets, minus liabilities other than

borrowings, bears to the aggregate amount of all borrowings. Borrowing money to increase each Fund's investment portfolio is known as "leveraging." Borrowing, especially when used for leverage, may cause the value of each Fund's shares to be more volatile than if the Fund did not borrow. This is because borrowing tends to magnify the effect of any increase or decrease in the value of each Fund's portfolio holdings. Borrowed money thus creates an opportunity for greater gains, but also greater losses. To repay borrowings, each Fund may have to sell securities at a time and at a price that is unfavorable to the Fund. There also are costs associated with borrowing money, and these costs would offset and could eliminate each Fund's net investment income in any given period. Currently, each Fund's does not contemplate borrowing money for investment purposes. The Funds' Investment Restriction regarding borrowing will be interpreted to permit each Fund to engage in trading practices and investments that may be considered to be borrowing to the extent permitted by the 1940 Act. Reverse repurchase agreements may be considered to be a type of borrowing. Short-term credits necessary for the settlement of securities transactions and arrangements with respect to securities lending will not be considered to be borrowings under the policy. Practices and investments that may involve leverage but are not considered to be borrowings are not subject to the policy. Such trading practices may include futures, options on futures, forward contracts and other derivative investments.

Issuance of Senior Securities

Generally, issuing senior securities is prohibited under the 1940 Act; however, certain exceptions apply such as in the case of borrowing and certain other leveraging transactions. With respect to each Fund's fundamental investment restriction relating to issuing senior securities, "senior securities" are defined as fund obligations that have a priority over the Fund's shares with respect to the payment of dividends or the distribution of fund assets. The 1940 Act prohibits each Fund from issuing senior securities except that the Fund may borrow money in amounts of up to one-third of the Fund's total assets from banks for any purpose as discussed above. Each Fund also may borrow up to 5% of the Fund's total assets from banks or other lenders for temporary purposes, and these borrowings are not considered senior securities. The issuance of senior securities by a Fund can increase the speculative character of the Fund's outstanding shares through leveraging. Leveraging of a Fund's portfolio through the issuance of senior securities magnifies the potential for gain or loss on monies, because even though the Fund's net assets remain the same, the total risk to investors is increased. Certain widely used investment practices that involve a commitment by a Fund to deliver money or securities in the future are not considered by the SEC to be senior securities, provided that the Fund segregates cash or liquid securities in an amount necessary to pay the obligation or the Fund holds an offsetting commitment from another party. These investment practices include repurchase and reverse repurchase agreements, dollar rolls, options, futures and forward contracts. The Funds' policy will be interpreted not to prevent collateral arrangements with respect to options, forward or futures contracts or other derivatives, or the posting of initial or variation margin.

Options, Futures and Other Derivative Strategies

General

Each Fund may invest in futures, forwards, options, spot contracts, financial indices and instruments, currencies and interest rates (collectively, "Financial Instruments"). The use of such Financial Instruments is subject to applicable regulations of the SEC, the several exchanges upon which they are traded and the Commodity Futures Trading Commission ("CFTC"). In addition, the Funds' ability to use Financial Instruments will be limited by tax considerations.

In addition to the instruments, strategies and risks described below and in the Prospectus, the Adviser may discover additional opportunities in connection with Financial Instruments and other similar or related techniques. These new opportunities may become available as the Adviser develops new

techniques, as regulatory authorities broaden the range of permitted transactions and as new Financial Instruments or other techniques are developed. The Adviser may utilize these opportunities to the extent that they are consistent with the Funds' investment objectives and permitted by the Funds' investment limitations and applicable regulatory authorities. The Prospectus or this SAI will be supplemented to the extent that new products or techniques involve materially different risks than those described below or in the Prospectus.

The use of Financial Instruments involves special considerations and risks which include, but are not limited to, the following:

- (1) Successful use of most Financial Instruments depends upon the Adviser's ability to predict movements of the overall securities markets, which requires different skills than predicting changes in the prices of individual securities. The ordinary spreads between prices in the cash and futures markets, due to the differences in the natures of those markets, are subject to distortion. Due to the possibility of distortion, a correct forecast of stock market trends by the Adviser may still not result in a successful transaction. The Adviser may be incorrect in its expectations as to the extent of market movements or the time span within which the movements take place, which, thus, may result in the strategy being unsuccessful.
- (2) The prices of Financial Instruments can diverge from the prices of their underlying instruments and may be affected by such factors as current and anticipated short-term interest rates, changes in volatility of the underlying instrument and the time remaining until expiration of the contract, which may not affect security prices the same way. Imperfect or no correlation also may result from differing levels of demand in the options and futures markets and the securities markets, from structural differences in how options and futures and securities are traded, and from imposition of daily price fluctuation limits or trading halts.
- (3) As described below, each Fund might be required to maintain assets as "cover," maintain segregated accounts or make margin payments when it takes positions in Financial Instruments involving obligations to third parties (*e.g.*, Financial Instruments other than purchased options). If a Fund were unable to close out its positions in such Financial Instruments, it might be required to continue to maintain such assets or accounts or make such payments until the position expired or matured. These requirements might impair a Fund's ability to sell a portfolio security or make an investment when it would otherwise be favorable to do so or require that the Fund sell a portfolio security at a disadvantageous time. A Fund's ability to close out a position in a Financial Instrument prior to expiration or maturity depends on the existence of a liquid secondary market or, in the absence of such a market, the ability and willingness of the other party to the transaction (the "counter-party") to enter into a transaction closing out the position. Therefore, there is no assurance that any position can be closed out at a time and price that is favorable to the Fund.

Each Fund will not enter into any transactions using Financial Instruments (except for purchased options) unless it owns either (1) an offsetting ("covered") position in securities or other options or futures contracts or (2) cash and liquid assets with a value, marked-to-market daily, sufficient to cover its potential obligations to the extent not covered as provided in (1) above. Each Fund will comply with SEC guidelines regarding cover for these instruments and will, if the guidelines so require, set aside cash or liquid assets in an account with its custodian in the prescribed amount as determined daily.

Assets used as cover or held in an account cannot be sold while the position in the corresponding Financial Instrument is open, unless they are replaced with other appropriate assets. As a result, the commitment of a large portion of each Fund's assets to cover or held in accounts could impede portfolio management or the Fund's ability to meet redemption requests or other current obligations. Losses may

arise due to unanticipated market price movements, lack of a liquid secondary market for any particular instrument at a particular time or due to losses from premiums paid by a Fund on options transactions.

Options

A call option gives the purchaser the right to buy, and obligates the writer to sell, the underlying investment at the agreed-upon price during the option period. A put option gives the purchaser the right to sell, and obligates the writer to buy, the underlying investment at the agreed-upon price during the option period. Purchasers of options pay an amount, known as a premium, to the option writer in exchange for the right under the option contract.

The purchase of call options can serve as a long hedge, and the purchase of put options can serve as a short hedge. Writing put or call options can enable a Fund to enhance income or yield by reason of the premiums paid by the purchasers of such options. However, a Fund may also suffer a loss as the result of writing options. For example, if the market price of the security underlying a put option declines to less than the exercise price of the option, minus the premium received, the Fund would suffer a loss.

Writing call options can serve as a limited short hedge, because declines in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security appreciates to a price higher than the exercise price of the call option, it can be expected that the option will be exercised and the Fund will be obligated to sell the security at less than its market value. If the call option is an over-the-counter (OTC) option, the securities or other assets used as cover may be considered illiquid.

Writing put options can serve as a limited long hedge because increases in the value of the hedged investment would be offset to the extent of the premium received for writing the option. However, if the security depreciates to a price lower than the exercise price of the put option, it can be expected that the put option will be exercised and a Fund will be obligated to purchase the security or at more than its market value. If the put option is an OTC option, the securities or other assets used as cover may be considered illiquid.

The value of an option position will reflect, among other things, the current market value of the underlying investment, the time remaining until expiration, the relationship of the exercise price to the market price of the underlying investment, the historical price volatility of the underlying investment and general market conditions. The exercise price of the options may be below, equal to or above the current market value of the underlying security or other instrument. Options that expire unexercised have no value, and the Fund will realize a loss in the amount of the premium paid and any transaction costs.

Each Fund may effectively terminate its right or obligation under an option by entering into a closing transaction. For example, each Fund may terminate its obligation under a call or put option that it had written by purchasing an identical call or put option; this is known as a closing purchase transaction. Conversely, each Fund may terminate a position in a put or call option it had purchased by writing an identical put or call option; this is known as a closing sale transaction. Closing transactions permit each Fund to realize profits or limit losses on an option position prior to its exercise or expiration.

Risks of Options on Securities. Options offer large amounts of leverage, which will result in each Fund's net asset value being more sensitive to changes in the value of the related instrument. Each Fund may purchase or write both exchange-traded and OTC options. Exchange-traded options in the United States are issued by a clearing organization affiliated with the exchange on which the option is listed that, in effect, guarantees completion of every exchange-traded option transaction. In contrast, OTC options are contracts between a Fund and its counterparty (usually a securities dealer or a bank) with no clearing organization guarantee. Thus, when a Fund purchases an OTC option, it relies on the counterparty from

whom it purchased the option to make or take delivery of the underlying investment upon exercise of the option. Failure by the counterparty to do so would result in the loss of any premium paid by a Fund as well as the loss of any expected benefit of the transaction.

Each Fund's ability to establish and close out positions in exchange-listed options depends on the existence of a liquid market. However, there can be no assurance that such a market will exist at any particular time. Closing transactions can be made for OTC options only by negotiating directly with the counterparty, or by a transaction in the secondary market if any such market exists. There can be no assurance that each Fund will in fact be able to close out an OTC option position at a favorable price prior to expiration. In the event of insolvency of the counterparty, each Fund might be unable to close out an OTC option position at any time prior to its expiration, if at all.

If a Fund were unable to effect a closing transaction for an option it had purchased, due to the absence of a secondary market, the imposition of price limits or otherwise, it would have to exercise the option to realize any profit. The inability to enter into a closing transaction for a covered call option written by a Fund could leave the Fund unable to prevent material losses because the Fund would be unable to sell the investment used as cover for the written option until the option expires or is exercised.

OTC Options. Unlike exchange-traded options, which are standardized with respect to the underlying instrument, expiration date, contract size and strike price, the terms of OTC options (options not traded on exchanges) generally are established through negotiation with the other party to the option contract. While this type of arrangement allows each Fund great flexibility to tailor the option to its needs, OTC options generally involve greater risk than exchange-traded options, which are guaranteed by the clearing organization of the exchanges where they are traded. Assets used as cover for OTC options may be considered illiquid.

Options on Indices. Puts and calls on indices are similar to puts and calls on securities except that all settlements are in cash and gain or loss depends on changes in the index in question rather than on price movements in individual securities. When a Fund writes a call on an index, it receives a premium and agrees that, prior to the expiration date, the purchaser of the call, upon exercise of the call, will receive from the Fund an amount of cash if the closing level of the index upon which the call is based is greater than the exercise price of the call. The amount of cash is equal to the difference between the closing price of the index and the exercise price of the call times a specified multiple ("multiplier"), which determines the total dollar value for each point of such difference. When a Fund buys a call on an index, it pays a premium and has the same rights as to such call as are indicated above. When a Fund buys a put on an index, it pays a premium and has the right, prior to the expiration date, to require the seller of the put, upon the Fund's exercise of the put, to deliver to the Fund an amount of cash if the closing level of the index upon which the put is based is less than the exercise price of the put, which amount of cash is determined by the multiplier, as described above for calls. When a Fund writes a put on an index, it receives a premium and the purchaser of the put has the right, prior to the expiration date, to require the Fund to deliver to it an amount of cash equal to the difference between the closing level of the index and exercise price times the multiplier if the closing level is less than the exercise price.

Risks of Options on Indices. The risks of investment in options on indices may be greater than options on securities. Because index options are settled in cash, when a Fund writes a call on an index it cannot provide in advance for its potential settlement obligations by acquiring and holding the underlying securities. A Fund can offset some of the risk of writing a call index option by holding a diversified portfolio of securities similar to those on which the underlying index is based. However, each Fund cannot, as a

practical matter, acquire and hold a portfolio containing exactly the same securities as underlie the index and, as a result, bears a risk that the value of the securities held will vary from the value of the index.

Even if a Fund could assemble a portfolio that exactly reproduced the composition of the underlying index, it still would not be fully covered from a risk standpoint because of the “timing risk” inherent in writing index options. When an index option is exercised, the amount of cash that the holder is entitled to receive is determined by the difference between the exercise price and the closing index level on the date when the option is exercised. As with other kinds of options, a Fund as the call writer will not learn that the Fund has been assigned until the next business day at the earliest. The time lag between exercise and notice of assignment poses no risk for the writer of a covered call on a specific underlying security, such as common stock, because there the writer’s obligation is to deliver the underlying security, not to pay its value as of a fixed time in the past. So long as the writer already owns the underlying security, it can satisfy its settlement obligations by simply delivering it, and the risk that its value may have declined since the exercise date is borne by the exercising holder. In contrast, even if the writer of an index call holds securities that exactly match the composition of the underlying index, it will not be able to satisfy its assignment obligations by delivering those securities against payment of the exercise price. Instead, it will be required to pay cash in an amount based on the closing index value on the exercise date. By the time it learns that it has been assigned, the index may have declined, with a corresponding decline in the value of its portfolio. This “timing risk” is an inherent limitation on the ability of index call writers to cover their risk exposure by holding securities positions.

If a Fund has purchased an index option and exercises it before the closing index value for that day is available, it runs the risk that the level of the underlying index may subsequently change. If such a change causes the exercised option to fall out-of-the-money, a Fund will be required to pay the difference between the closing index value and the exercise price of the option (times the applicable multiplier) to the assigned writer.

Futures and Options on Futures

Futures contracts provide for the future sale by one party and purchase by another party of a specified amount of a specific underlying reference instrument at a specified future time at a specified price.

An option on a futures contract is the right, purchased for a certain price, to either buy or sell the underlying futures contract during a certain period of time for a fixed price. Options trading requires many of the same skills as does successful futures contract trading. However, since specific market movements of the underlying futures contract must be predicted accurately, the risks involved are somewhat different. For example, if a Fund buys an option (either to sell or buy a futures contract), the Fund will pay a “premium” representing the market value of the option. Unless the price of the futures contract underlying the option changes and it becomes profitable to exercise or offset the option before it expires, a Fund may lose the entire amount of the premium. Conversely, if a Fund sells an option (either to sell or buy a futures contract), the Fund will be credited with the premium but will have to deposit margin due to the Fund’s contingent liability to take or make delivery of the underlying futures contract in the event the option is exercised. The writing of an option involves the risk of losing the entire investment or substantially more than the entire investment, thereby causing significant losses to the client in a relatively short period of time. The ability to trade in or exercise options may be restricted in the event that trading in the underlying futures contract becomes restricted.

An index futures contract is a bilateral agreement pursuant to which two parties agree to take or make delivery of an amount of cash equal to a specified dollar amount times the difference between the index value at the close of trading of the contract and the price at which the futures contract is originally

struck. No physical delivery of the securities comprising the index is made; generally contracts are closed out prior to their expiration date.

There are risks associated with these activities, including the following: (1) the success of a hedging strategy may depend on an ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) there may be an imperfect or lack of correlation between the changes in market value of the securities held and the prices of futures and options on futures; (3) there may not be a liquid secondary market for a futures contract or option; (4) trading restrictions or limitations may be imposed by an exchange; and (5) government regulations may restrict trading in futures contracts and options on futures.

Forward Trading. Each Fund may trade forward contracts. Forward contracts are not traded on exchanges and are not standardized; rather, banks and dealers act as principals in these markets negotiating each transaction on an individual basis. Neither the CFTC nor any banking authority regulates trading in forward contracts. In addition, there is no limitation on the daily price movements of forward contracts. Principals in the forward markets have no obligation to continue to make markets in the forward contracts traded. There have been periods during which certain banks or dealers have refused to quote prices for forward contracts or have quoted prices with an unusually wide spread between the price at which they are prepared to buy and that at which they are prepared to sell. Disruptions can occur in the forward markets because of unusually high trading volume, political intervention or other factors. For example, the imposition of credit controls by governmental authorities might limit forward trading, to the possible detriment of the Fund.

In its forward trading, a Fund is subject to the risk of the bankruptcy of, or the inability or refusal to perform with respect to its forward contracts by, the principals with which the Fund trades. Funds on deposit with such principals are generally not protected by the same segregation requirements imposed on CFTC regulated commodity brokers in respect of customer funds on deposit with them. However, each Fund intends to engage in forward trading only with large, well-capitalized banks and dealers. Each Fund may place forward trades through agents, so that the insolvency or bankruptcy of such agents could also subject the Fund to the risk of loss.

Short-Term Investments

Each Fund may invest in any of the following securities and instruments:

Certificates of Deposit, Bankers' Acceptances and Time Deposits

Each Fund may hold certificates of deposit, bankers' acceptances and time deposits. Certificates of deposit are negotiable certificates issued against funds deposited in a commercial bank for a definite period of time and earning a specified return. Bankers' acceptances are negotiable drafts or bills of exchange, normally drawn by an importer or exporter to pay for specific merchandise, which are "accepted" by a bank, meaning in effect that the bank unconditionally agrees to pay the face value of the instrument on maturity. Certificates of deposit and bankers' acceptances acquired by a Fund will be dollar-denominated obligations of domestic banks, savings and loan associations or financial institutions which, at the time of purchase, have capital, surplus and undivided profits in excess of \$100 million (including assets of both domestic and foreign branches), based on latest published reports or less than \$100 million if the principal amount of such bank obligations are fully insured by the U.S. government.

In addition to buying certificates of deposit and bankers' acceptances, each Fund also may make interest-bearing time or other interest-bearing deposits in commercial or savings banks. Time deposits are non-negotiable deposits maintained at a banking institution for a specified period of time at a specified interest rate.

Repurchase Agreements

When cash is temporarily available, or for temporary defensive purposes, each Fund may invest without limit in repurchase agreements. A repurchase agreement is an agreement under which either U.S. Government obligations or other high-quality liquid debt securities are acquired from a securities dealer or bank subject to resale at an agreed-upon price and date. The securities are held for the Funds by a custodian bank as collateral until resold and will be supplemented by additional collateral if necessary to maintain a total value equal to or in excess of the value of the repurchase agreement. Each Fund bears a risk of loss if the other party to a repurchase agreement defaults on its obligations and the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities, which may decline in value in the interim. Each Fund will enter into repurchase agreements only with financial institutions determined by the Adviser to present minimal risk of default during the term of the agreement. Repurchase agreements are usually for a term of one week or less but may be for longer periods. Repurchase agreements maturing in more than seven days may be considered illiquid.

Reverse Repurchase Agreements

Each Fund may enter into reverse repurchase agreements. A reverse repurchase agreement has the characteristics of a secured borrowing by each Fund and creates leverage in the Fund's portfolio. In a reverse repurchase transaction, a Fund sells a portfolio instrument to another person, such as a financial institution or broker/dealer, in return for cash. At the same time, each Fund agrees to repurchase the instrument at an agreed-upon time and at a price that is greater than the amount of cash that the Fund received when it sold the instrument, representing the equivalent of an interest payment by the Fund for the use of the cash. During the term of the transaction, a Fund will continue to receive any principal and interest payments (or the equivalent thereof) on the underlying instruments. Each Fund may engage in reverse repurchase agreements as a means of raising cash to satisfy redemption requests or for other temporary or emergency purposes. Unless otherwise limited in the Prospectus or this SAI, each Fund may also engage in reverse repurchase agreements to the extent permitted by its fundamental investment policies in order to raise additional cash to be invested by the Fund's portfolio manager in other securities or instruments in an effort to increase the Fund's investment returns. During the term of the transaction, each Fund will remain at risk for any fluctuations in the market value of the instruments subject to the reverse repurchase agreement as if it had not entered into the transaction. When a Fund reinvests the proceeds of a reverse repurchase agreement in other securities, the Fund will also be at risk for any fluctuations in the market value of the securities in which the proceeds are invested. Like other leveraging risks, this makes the value of an investment in a Fund more volatile and increases the Fund's overall investment exposure. In addition, if a Fund's return on its investment of the proceeds of the reverse repurchase agreement does not equal or exceed the implied interest that it is obligated to pay under the reverse repurchase agreement, engaging in the transaction will lower the Fund's return. When a Fund enters into a reverse repurchase agreement, it is subject to the risk that the buyer under the agreement may file for bankruptcy, become insolvent or otherwise default on its obligations to the Fund. In the event of a default by the counterparty, there may be delays, costs and risks of loss involved in a Fund's exercising its rights under the agreement, or those rights may be limited by other contractual agreements or obligations or by applicable law. In addition, a Fund may be unable to sell the instruments subject to the reverse repurchase agreement at a time when it would be advantageous to do so, or may be required to liquidate portfolio securities at a time when it would be disadvantageous to do so in order to make payments with respect to its obligations under a reverse repurchase agreement. This could adversely affect the portfolio manager's strategy and result in lower Fund returns. At the time a Fund enters into a reverse repurchase agreement, the Fund is required to set aside cash or other appropriate liquid securities in the amount of the Fund's obligation under the reverse repurchase agreement or take certain other actions in accordance with SEC guidelines, which may affect the Fund's liquidity and ability to manage its assets. Although complying with SEC guidelines would have the effect of limiting the amount of Fund assets that may be committed to reverse repurchase

agreements and other similar transactions at any time, it does not otherwise mitigate the risks of entering into reverse repurchase agreements.

Additional Risks

Risk of Potential Government Regulation of Derivatives

It is possible that government regulation of various types of derivative instruments, including futures and swap agreements, may limit or prevent the Fund from using such instruments as a part of its investment strategy or may increase the costs associated with using those instruments and could ultimately prevent the Fund from being able to fully achieve its investment objectives. It is impossible to fully predict the effects of past, present or future legislation and regulation in this area, but the effects could be substantial and adverse.

The futures markets are subject to comprehensive statutes, regulations, and margin requirements. In addition, the SEC, CFTC and the exchanges are authorized to take extraordinary actions in the event of a market emergency, including, for example, the implementation or reduction of speculative position limits, the implementation of higher margin requirements, the establishment of daily price limits and the suspension of trading.

The regulation of swaps and futures transactions in the U.S. is a rapidly changing area of law and is subject to modification by government and judicial action. There is a possibility of future regulatory changes altering, perhaps to a material extent, the nature of an investment in the Fund or the ability of the Fund to continue to implement its investment strategies. In particular, the Dodd-Frank Act sets forth a legislative framework for over-the-counter (“OTC”) derivatives, such as swaps, in which the Fund may invest. Title VII of the Dodd-Frank Act makes broad changes to the OTC derivatives market, grants significant new authority to the SEC and the CFTC to regulate OTC derivatives and market participants, and, among other things, requires clearing of many OTC derivatives transactions and imposes minimum margin and capital requirements on uncleared OTC derivatives transactions.

In addition, on October 28, 2020, the Securities and Exchange Commission adopted new regulations governing the use of derivatives by registered investment companies (“Rule 18f-4”). The Fund was required to comply with Rule 18f-4 by August 19, 2022. Rule 18f-4 imposes limits on the amount of derivatives the Fund can enter into, eliminated the asset segregation framework previously used by Fund to comply with Section 18 of the 1940 Act, treats derivatives as senior securities so that a failure to comply with the limits would result in a statutory violation and requires the Fund, to the extent its use of derivatives is more than a limited specified exposure amount, to establish and maintain a comprehensive derivatives risk management program and appoint a derivatives risk manager.

Risks Associated With Recent Market Events

The Funds could lose money over short periods due to short-term market movements and over longer periods during more prolonged market downturns. The value of a security or other instrument may decline due to changes in general market conditions, economic trends or events that are not specifically related to the issuer of the security or other instrument, or factors that affect a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector or asset class. During a general market downturn, multiple asset classes may be negatively affected. Changes in market conditions and interest rates generally do not have the same impact on all types of securities and instruments.

Stresses associated with the 2008 financial crisis in the United States and global economies peaked approximately a decade ago, but periods of unusually high volatility in the financial markets and restrictive credit conditions, sometimes limited to a particular sector or a geography, continue to recur. Some countries, including the United States, have adopted and/or are considering the adoption of more protectionist trade policies, a move away from the tighter financial industry regulations that followed the

financial crisis, and/or substantially reducing corporate taxes. The exact shape of these policies is still being considered, but the equity and debt markets may react strongly to expectations of change, which could increase volatility, especially if the market's expectations are not borne out. A rise in protectionist trade policies, and the possibility of changes to some international trade agreements, could affect the economies of many nations in ways that cannot necessarily be foreseen at the present time. In addition, geopolitical and other risks, including environmental and public health, may add to instability in world economies and markets generally. Economies and financial markets throughout the world are becoming increasingly interconnected. As a result, whether or not the Funds invest in securities of issuers located in or with significant exposure to countries experiencing economic, political and/or financial difficulties, the value and liquidity of a Fund's investments may be negatively affected by such events.

An outbreak of infectious respiratory illness caused by a novel coronavirus known as COVID-19 was first detected in China in December 2019 and has now been detected globally. On March 11, 2020, the World Health Organization announced that it had made the assessment that COVID-19 can be characterized as a pandemic. COVID-19 has resulted in travel restrictions, closed international borders, enhanced health screenings at ports of entry and elsewhere, disruption of and delays in healthcare service preparation and delivery, prolonged quarantines, cancellations, business and school closings, supply chain disruptions, and lower consumer demand, as well as general concern and uncertainty. The impact of COVID-19, and other infectious illness outbreaks that may arise in the future, could adversely affect the economies of many nations or the entire global economy, individual issuers and capital markets in ways that cannot necessarily be foreseen. In addition, the impact of infectious illnesses in emerging market countries may be greater due to generally less established healthcare systems. Public health crises caused by the COVID-19 outbreak may exacerbate other pre-existing political, social and economic risks in certain countries or globally. The duration of the COVID-19 outbreak and its effects cannot be determined with certainty. The value of the Funds and the securities in which the Funds invest may be adversely affected by impacts caused by COVID-19 and other epidemics and pandemics that may arise in the future.

Russia's invasion of Ukraine, and corresponding events in late February 2022, have had, and could continue to have, severe adverse effects on regional and global economic markets for securities and commodities. Following Russia's actions, various governments, including the United States, have issued broad-ranging economic sanctions against Russia, including, among other actions, a prohibition on doing business with certain Russian companies, large financial institutions, officials and oligarchs; the removal by certain countries and the European Union of selected Russian banks from the Society for Worldwide Interbank Financial Telecommunications ("SWIFT"), the electronic banking network that connects banks globally; and restrictive measures to prevent the Russian Central Bank from undermining the impact of the sanctions. The current events, including sanctions and the potential for future sanctions, including any impacting Russia's energy sector, and other actions, and Russia's retaliatory responses to those sanctions and actions, may continue to adversely impact the Russian economy and may result in the further decline of the value and liquidity of Russian securities, a continued weakening of the ruble and continued exchange closures, and may have other adverse consequences on the Russian economy that could impact the value of Russian investments and impair the ability of the Fund to buy, sell, receive or deliver those securities. Moreover, those events have, and could continue to have, an adverse effect on global markets performance and liquidity, thereby negatively affecting the value of the Fund's investments beyond any direct exposure to Russian issuers. The duration of ongoing hostilities and the vast array of sanctions and related events cannot be predicted. Those events present material uncertainty and risk with respect to markets globally and the performance of the Fund and its investments or operations could be negatively impacted.

Government Intervention in Financial Markets Risk

Instability in the financial markets may lead the U.S. government and foreign governments to take a number of unprecedented actions designed to support certain financial institutions and segments of the financial markets that may experience extreme volatility, and in some cases a lack of liquidity. U.S. federal and state governments and foreign governments, their regulatory agencies or self-regulatory organizations may take

additional actions that affect the regulation of the securities in which the Fund invests, or the issuers of such securities, in ways that are unforeseeable. Issuers of corporate securities might seek protection under the bankruptcy laws. Legislation or regulation may also change the way in which the Fund itself is regulated. Such legislation or regulation could limit or preclude the Fund's ability to achieve its investment objective.

Fundamental Investment Limitations

The Trust (on behalf of the Funds) has adopted the following restrictions as fundamental policies, which may not be changed without the favorable vote of the holders of a "majority of the outstanding voting securities of a Fund," as defined in the 1940 Act. Under the 1940 Act, the "vote of the holders of a majority of the outstanding voting securities" means the vote of the holders of the lesser of (i) 67% of the shares of a Fund represented at a meeting at which the holders of more than 50% of its outstanding shares are represented or (ii) more than 50% of the outstanding shares of a Fund.

Each Fund may not:

1. Issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act, as amended, the rules and regulations promulgated thereunder or interpretations of the SEC or its staff;
2. Borrow money, except (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions, provided that the Fund has an asset coverage of 300% for all borrowings and repurchase commitments of the Fund pursuant to reverse repurchase transactions;
3. Purchase securities on margin, participate on a joint or joint and several basis in any securities trading account, or underwrite securities. (Does not preclude the Fund from obtaining such short-term credit as may be necessary for the clearance of purchases and sales of its portfolio securities, and except to the extent that the Fund may be deemed an underwriter under the Securities Act of 1933, by virtue of disposing of portfolio securities);
4. Purchase or sell real estate or interests in real estate. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate or real estate acquired as a result of such investments. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts);
5. Invest 25% or more of the market value of its assets in the securities of companies engaged in any one industry. (Does not apply to investment in the securities of the U.S. Government, its agencies or instrumentalities.);
6. Purchase or sell commodities (unless acquired as a result of ownership of securities or other investments) or commodity futures contracts, except that the Fund may purchase and sell futures contracts and options to the full extent permitted under the 1940 Act, sell foreign currency contracts in accordance with any rules of the Commodity Futures Trading Commission, invest in securities or other instruments backed by commodities, and invest in companies that are engaged in a commodities business or have a significant portion of their assets in commodities;
7. Make loans to others, except (a) through the purchase of debt securities in accordance with its investment objectives and policies, (b) to the extent the entry into a repurchase agreement is deemed to be a loan, and (c) by loaning portfolio securities; or
8. Make an investment unless 75% of the value of that Fund's total assets is represented by cash, cash items, U.S. government securities, securities of other investment companies and "other securities." For purposes of this restriction, the term "other securities" means securities as to which the Fund invests no more than 5% of the value of its total assets in any one issuer or purchases

no more than 10% of the outstanding voting securities of any one issuer. As a matter of operating policy, the Fund will not consider repurchase agreements to be subject to the above-stated 5% limitation if all of the collateral underlying the repurchase agreements are U.S. government securities and such repurchase agreements are fully collateralized.

The following lists the non-fundamental investment restrictions applicable to the Fund. These restrictions can be changed by the Board of Trustees, but the change will only be effective after notice is given to shareholders of the Fund.

Each Fund may not:

1. Invest in securities of other investment companies except as permitted under the 1940 Act or the rules thereunder;
2. Invest 15% or more of the value of its net assets, computed at the time of investment, in illiquid securities. Illiquid securities are those securities without readily available market quotations, including repurchase agreements having a maturity of more than seven days. Illiquid securities may include restricted securities not determined by the Board of Trustees to be liquid, non-negotiable time deposits, over-the-counter options and repurchase agreements providing for settlement in more than seven days after notice; or
3. Invest in other investment companies advised by the same investment adviser as the Fund or in investment companies advised by affiliates of such adviser.

Except with respect to borrowing and illiquid securities, if a percentage or rating restriction on investment or use of assets set forth herein or in the Prospectus is adhered to at the time a transaction is effected, later changes in percentage resulting from any cause other than actions by the Fund will not be considered a violation.

Management of the Funds

Board of Trustees

The management and affairs of the Funds are supervised by the Board of Trustees. The Board of Trustees consists of five individuals, four (4) of whom are not “interested persons” (as defined under the 1940 Act) of the Trust and the Adviser (“Independent Trustees”). The Trustees are fiduciaries for the Fund’s shareholders and are governed by the laws of the State of Delaware in this regard. The Board of Trustees establishes policies for the operation of the Fund and appoints the officers who conduct the daily business of the Funds.

Board Leadership Structure

The Trust is led by Mr. Brian Nielsen, who has served as the Chairman of the Board since 2011.. The Board of Trustees is comprised of Mr. Nielsen and four (4) other Independent Trustees. Under certain 1940 Act governance guidelines that apply to the Trust, the Independent Trustees will meet in executive session, at least quarterly. Under the Trust’s Agreement and Declaration of Trust and By-Laws, the Chairman of the Board is responsible for (a) presiding at board meetings, (b) calling special meetings on an as-needed basis, (c) setting the agendas for board meetings and ensuring board members are provided necessary materials in advance of each board meeting. The Trust believes that (i) its Chairman, Brian Nielsen, (ii) the independent chair of the Audit Committee, Keith Rhoades and (iii), as an entity, the full Board of Trustees, provide effective leadership that is in the best interests of the Trust, each of its funds and each shareholder.

In accordance with the fund governance standards prescribed by the SEC under the 1940 Act, the Independent Trustees on the Nominating Committee select and nominate all candidates for Independent Trustee positions. Each Trustee was appointed to serve on the Board of Trustees because of his experience,

qualifications, attributes and/or skills. The Board of Trustees reviews its leadership structure regularly on at least an annual basis. The Board of Trustees believes that the structure described above facilitates the orderly and efficient flow of information to the Trustees from the officers of the Trust, the advisers of the funds that comprise the Trust and other service providers, and facilitates the effective evaluation of the risks and other issues, including conflicts of interest, that may impact the Trust as a whole as well as the funds individually. The Board of Trustees believes that the orderly and efficient flow of information and the ability of the Board of Trustees to bring each Trustee's experience and skills to bear in overseeing the Trust's operations is important given the characteristics and circumstances of the Trust, including: the unaffiliated nature of each investment adviser and the fund(s) managed by such adviser; the number of funds that comprise the Trust; the variety of asset classes that those funds reflect; the net assets of the Trust; the committee structure of the Trust; and the independent arrangements of each of the Trust's series. For these reasons, the Board of Trustees believes that its leadership structure is appropriate.

Board Responsibilities

The Board of Trustees' role is one of oversight rather than day-to-day management of any of the Trust's series. The Trust's Audit Committee assists with this oversight function. The Board of Trustees' oversight extends to the Trust's risk management processes. Those processes are overseen by Trust officers, including the President, the Treasurer, the Secretary and Chief Compliance Officer ("CCO"), who regularly report to the Board of Trustees on a variety of matters at Board meetings.

Board Risk Oversight.

The Board of Trustees is comprised of Mr. Nielsen, as Chairman, and four (4) other Independent Trustees with a standing independent Audit Committee with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its CCO at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the CCO is the primary recipient and communicator of such risk-related information and oversees the Trust's service providers' adherence to the Trust's policies and procedures.

Investment advisers managing the Trust's series report to the Trust's CCO and the Board of Trustees, on a regular and as-needed basis, on actual and possible risks affecting the Trust's series. These investment advisers report to the Trust's CCO and the Board of Trustees on various elements of risk, including investment, credit, liquidity, valuation, operational and compliance risks, as well as any overall business risks that could impact the Trust's series.

The Board of Trustees has appointed the CCO, who reports directly to the Board of Trustees and who participates in its regular meetings. In addition, the CCO conducts on-going and continuous compliance testing and presents an annual report to the Board of Trustees in accordance with the Trust's compliance policies and procedures. The CCO, together with the Trust's President, Treasurer and Secretary, regularly discusses risk issues affecting the Trust and its series during Board of Trustee meetings. The CCO also provides updates to the Board of Trustees on the operation of the Trust's compliance policies and procedures and on how these procedures are designed to mitigate risk. Finally, the CCO and/or other officers of the Trust report to the Board of Trustees in the event that any material risk issues arise in between Board meetings.

Trustee Qualifications.

Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills. Mr. Nielsen has over twenty-two years of experience in the investment management and brokerage business including a focus in compliance, legal and regulatory oversight and possesses a strong understanding of the regulatory

framework under which investment companies must operate. Since 2010, Thomas Sarkany has been the President of TTS Consultants, LLC, and since December 2022 has been the President of TTS Associates, Inc., each a financial services firm and from 1994 through 2010 held various roles at Value Line, Inc. (a publicly held company providing financial research, publications and money management services to retail and institutional investors), including Director of Marketing and Asset Management, Director of Index Licensing, and member of the Board of Directors. Anthony Lewis has been Chairman and CEO of The Lewis Group USA, an executive consulting firm, for the past ten years, and also serves as a Director, the Chairman of the Compensation Committee, and a Member of the Audit Committee of Torotel Inc. Keith Rhoades held various accounting roles at Union Pacific Railroad, including Senior Director of General Ledger/Financial Research. Randy Skalla has more than 20 years of investment management experience including serving as the President of L5 Enterprises, Inc. since 2001 and from 2001 through 2017 was a member of the Orizon Investment Counsel Board. The Trust does not believe any one factor is determinative in assessing a Trustee’s qualifications, but that the collective experience of each Trustee makes them each highly qualified.

The Board of Trustees has established three standing board committees – the Audit Committee, the Compensation Committee, and the Nominating Committee. All Independent Trustees are members of the Audit Committee, Compensation Committee and the Nominating Committee. Inclusion of all Independent Trustees as members of all three standing committees allows all such Trustees to participate in the full range of the Board of Trustees’ oversight duties, including oversight of risk management processes.

Trustees and Officers

The Trustees and the officers of the Trust are listed below with their addresses, present positions with the Trust and principal occupations over at least the last five years. The business address of each Trustee and Officer is 225 Pictoria Drive, Suite 450, Cincinnati, OH 45246. All correspondence to the Trustees and Officers should be directed to c/o Ultimus Fund Solutions, LLC, P.O. Box 541150, Omaha, Nebraska 68154.

Independent Trustees

* The term of office for each Trustee and Officer listed above will continue indefinitely.

** As of December 31, 2022, the Trust was comprised of 19 active portfolios managed by unaffiliated investment advisers. The term “Fund Complex” applies only to the Acclivity Small Cap Value Fund, Acclivity Mid Cap Multi-Style Fund, Dynamic U.S Opportunity Fund, and Dynamic International Opportunity Fund also managed by the same Adviser. The Funds do not hold themselves out as related to any other series within the Trust for investment purposes, nor do they share the same investment adviser with any other series.

Board Committees

Audit Committee. The Board has an Audit Committee, which is comprised of the Independent Trustees. The Audit Committee reviews financial statements and other audit-related matters for the Funds. The Audit Committee also holds discussions with management and with the Funds’ independent auditor concerning the scope of the audit and the auditor’s independence and will meet at least four times annually. During the fiscal year ended December 31, 2022 the Audit Committee met ten times.

Nominating Committee. The Board has a Nominating Committee, which is comprised of the Independent Trustees. The Nominating Committee is responsible for seeking and reviewing candidates for consideration as nominees for the position of trustee and meets only as necessary. The Nominating Committee generally will not consider shareholder nominees.

Compensation Committee. The Board has a Compensation Committee, which is comprised of the Independent Trustees. The role of the Compensation Committee is to oversee the evaluation of, and review and approve compensation for, the Independent Trustees. The Compensation Committee will generally meet annually.

Trustee Compensation

Each Trustee will receive a quarterly fee of \$21,250 (the “Trustee Fee”) to be paid at the beginning of each calendar quarter, allocated among each of the various portfolios comprising the Trust. Each Trustee will also receive reimbursement for any reasonable expenses incurred attending the regular quarterly meetings of the Trust. In addition to the Trustee Fee, the Audit Committee Chairman will receive an additional quarterly fee of \$4,000 and the Chairman of the Trust will receive an additional quarterly fee of \$5,250. For special in-person meetings, each Trustee will receive a \$2,500 special in-person meeting fee, as well as reimbursement for any reasonable expenses incurred attending the special in-person meeting, which fees will generally be paid by the Adviser requesting the special in-person meeting. None of the executive officers will receive compensation from the Trust.

The following table details the amount of compensation the Trustees received from the Funds during the fiscal year ended December 31, 2022.

Name	Acclivity Small Cap Value Fund	Acclivity Mid Cap Multi-Style Fund	Dynamic International Opportunity Fund	Dynamic U.S. Opportunity Fund	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From the Fund Complex Paid to Trustees***
Thomas T. Sarkany	\$4,103	\$4,103	\$4,103	\$4,103	None	None	\$16,402
Anthony Lewis	\$4,103	\$4,103	\$4,103	\$4,103	None	None	\$16,402
Keith Rhoades*	\$4,875	\$4,875	\$4,875	\$4,875	None	None	\$19,500
Randy Skalla	\$4,103	\$4,103	\$4,103	\$4,103	None	None	\$16,402
Brian Nielsen**	\$5,116	\$5,116	\$5,116	\$5,116	None	None	\$20,464

*Mr. Rhoades also serves as Chairman of the Audit Committee.

** Mr. Nielsen also serves as Chairman of the Trust.

*** There are currently multiple series comprising the Trust. The term “Fund Complex” refers only to the Acclivity Small Cap Value Fund, Acclivity Mid Cap Multi-Style Fund, Dynamic U.S. Opportunity Fund, and Dynamic International Opportunity Fund managed by the same adviser. For the period ended December 31, 2022, aggregate Independent Trustees’ fees were \$462,000.

Trustee Ownership

The Trustees and officers, as a group, own 0% of each operational Fund’s outstanding shares.

Control Persons and Principal Shareholders

A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of the Fund or acknowledges the existence of control. A controlling person possesses the ability to control the outcome of matters submitted for shareholder vote by the Fund. As of April 3, 2023, the following persons owned, beneficially or of record, 5% or more of a class of shares of the Funds.

Acclivity Small Cap Value Fund		
<u>Name of Shareholder</u>	<u>Total Shares Owned</u>	<u>% Of Share Class Owned</u>

Investment Adviser

As stated in the Prospectus, investment advisory services are provided to the Funds by Innealta Capital, LLC, located at 13215 Bee Cave Pkwy., Bldg. A, Suite 240, Austin, TX 78738, pursuant to an Investment Advisory Agreement (the “Advisory Agreement”). The Adviser is a majority-owned subsidiary of Riomaggiore Investments, LLC which in turn is controlled by Dr. Vito Sciaraffia as its sole member. Subject to such policies as the Board of Trustees may determine, the Adviser is ultimately responsible for investment decisions for the Funds. Pursuant to the terms of the Advisory Agreement, the Adviser provides the Funds with such investment advice and supervision as it deems necessary for the proper supervision of the Funds’ investments.

After an initial period of two years, the Advisory Agreement will continue in effect from year to year only if such continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of the Fund’s outstanding voting securities and by a majority of the trustees who are not parties to the Advisory Agreement or interested persons of any such party, at a meeting called for the purpose of voting on the Advisory Agreement. The Advisory Agreement is terminable without penalty by the Trust on behalf of a Fund upon 60 days’ prior written notice when authorized either by a majority vote of the applicable Fund’s shareholders or by a vote of a majority of the Board of Trustees, or by the Adviser upon 60 days’ prior written notice, and will automatically terminate in the event of its “assignment” (as defined in the 1940 Act). The Advisory Agreement provides that the Adviser, under such agreement, shall not be liable for any error of judgment or mistake of law or for any loss arising out of any investment or for any act or omission in the execution of portfolio transactions for the Fund, except for willful misfeasance, bad faith or negligence in the performance of its duties, or by reason of reckless disregard of its obligations and duties thereunder.

Under the Advisory Agreement, the Adviser, under the supervision of the Board, agrees (directly or through a subadviser) to invest the assets of the Funds in accordance with applicable law and the investment objectives, policies and restrictions set forth in the Funds’ current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser shall act as the investment adviser to the Fund and, as such shall (directly

or through a subadviser) (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold or retained by the Funds, and implement those decisions, including the selection of entities with or through which such purchases or sales are to be effected; provided, that the Adviser (directly or through a subadviser) will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer, (a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Funds with all necessary office facilities and personnel for servicing the Funds' investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Funds or the Adviser performing services relating to research, statistical and investment activities. The Advisory Agreement was approved by the Board of the Trust, including by a majority of the Independent Trustees, at a meeting held on July 23-24, 2018, and most recently renewed by the Board of the Trust, including a majority of the Independent Trustees at a meeting held on October 17 and 18, 2022.

In addition, the Adviser, directly subject to the supervision of the Board of Trustees, provides the management services necessary for the operation of the Funds and such additional administrative services as reasonably requested by the Board of Trustees. These services include providing such office space, office equipment and office facilities as are adequate to fulfill the Adviser's obligations under the Advisory Agreement; assisting the Trust in supervising relations with custodians, transfer and pricing agents, accountants, underwriters and other persons dealing with the Funds; assisting in preparing all general shareholder communications and conducting shareholder relations; assuring the Funds' records and the registration of the Funds' shares under federal securities laws and making necessary filings under state securities laws; developing management and shareholder services for the Funds; and furnishing reports, evaluations and analyses on a variety of subjects to the Trustees. Pursuant to the Advisory Agreement, the Acclivity Small Cap Value Fund, Acclivity Small Cap Growth Fund, and Acclivity Mid Cap Multi-Style Fund pay the Adviser a management fee at the annual rate of 0.39%, 0.39%, and 0.35% of each Fund's average daily net assets, respectively. The fee is computed daily and payable monthly. Prior to May 1, 2020, the Acclivity Small Cap Value Fund, Acclivity Small Cap Growth Fund, and Acclivity Mid Cap Multi-Style Fund each paid the Adviser a management fee at the annual rate of 0.55%, 0.55%, and 0.45% of each Fund's average daily net assets, respectively. The Adviser has agreed contractually to waive its management fee and to reimburse operating expenses (excluding brokerage fees and commissions, acquired fund fees and expenses, borrowing costs (such as interest and dividend expense on securities sold short), taxes and extraordinary expenses such as litigation) at least until April 30, 2024, such that net annual fund operating expenses of each Fund do not exceed the percentages in the table below. This operating expense limitation agreement can be terminated only by, or with the consent of, the Board of Trustees. The Adviser is permitted to receive reimbursement of any excess expense payments paid by it pursuant to the operating expense limitation agreement in future years on a rolling three-year basis, as long as the reimbursement does not cause a Fund's annual operating expenses to exceed the expense cap. Fee waiver and reimbursement arrangements can decrease the Funds' expenses and increase its performance.

Acclivity Small Cap Value Fund	Expense Limitation
Class N	0.73%
Class I	0.48%
Acclivity Small Cap Growth Fund	Expense Limitation
Class N	0.73%
Class I	0.48%

Acclivity Mid Cap Multi-Style Fund	Expense Limitation
Class N	0.69%
Class I	0.44%

Expenses not expressly assumed by the Adviser under the Advisory Agreement are paid by the Funds. Under the terms of the Advisory Agreement, the Funds are responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser or Distributor (as defined under the section entitled “The Distributor”) (c) the fees and certain expenses of the Custodian (as defined under the section entitled “Custodian”) and Transfer and Dividend Disbursing Agent (as defined under the section entitled “Transfer Agent”), including the cost of maintaining certain required records of the Funds and of pricing the Funds’ shares, (d) the charges and expenses of legal counsel and independent accountants for the Funds, (e) brokerage commissions and any issue or transfer taxes chargeable to the Funds in connection with its securities transactions, (f) all taxes and corporate fees payable by the Funds to governmental agencies, (g) the fees of any trade association of which the Funds may be a member, (h) the cost of share certificates representing shares of the Funds, (i) the cost of fidelity and liability insurance, (j) the fees and expenses involved in registering and maintaining registration of the Funds and of their shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Funds’ registration statements and prospectuses for such purposes, (k) all expenses of shareholders and Trustees’ meetings (including travel expenses of trustees and officers of the Trust who are directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders, and (l) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Trust’s business.

For the fiscal year(s) ended December 31, the Funds paid the following advisory fees to the Adviser pursuant to the Advisory Agreement, of which the Adviser waived or recouped the amount set forth in the following tables.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Advisory Fee	Recoupment (Waiver)	Advisory Fee after Waiver
December 31, 2022	\$47,103	\$(47,103)	\$0
December 31, 2021	\$19,989	\$(19,989)	\$0
December 31, 2020	\$10,228	\$(10,228)	\$0

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Advisory Fee	Recoupment (Waiver)	Advisory Fee after Waiver
December 31, 2022	\$1,389	\$(1,389)	\$0
December 31, 2021	\$935	\$(935)	\$0
December 31, 2020	\$428	\$(428)	\$0

The following tables show the amount of reimbursements paid to the Acclivity Small Cap Value Fund and Acclivity Mid Cap Multi-Style Fund by the Adviser in addition to the advisory fees waived for the fiscal years ended December 31:

Acclivity Small Cap Value Fund

Fiscal Year Ended	Amount of Fund Expenses Reimbursed to the Fund by the Adviser
December 31, 2022	\$135,709
December 31, 2021	\$142,002
December 31, 2020	\$107,101

Acclivity Mid Cap Multi Style Fund

Fiscal Year Ended	Amount of Fund Expenses Reimbursed to the Fund by the Adviser
December 31, 2022	\$138,473
December 31, 2021	\$141,580
December 31, 2020	\$106,945

Portfolio Managers

The following section provides information regarding the Portfolio Manager's other accounts managed, compensation, material conflicts of interests, and any ownership of securities in the Funds.

Dr. Vito Sciaraffia.

Dr. Sciaraffia serves as Chief Investment Officer of Innealta Capital, LLC. In addition, Dr. Sciaraffia served as Chief Investment Officer of Innealta Capital, a division of AFAM Capital Inc., since October 1st, 2015 to July 31st, 2018. In his Chief Investment Officer role, Dr. Sciaraffia is responsible for ensuring prudent management of all client assets, designing quantitative strategies, and leading the research activities of the investment team. His professional experience focuses heavily on the quantitative evaluation of equity securities and financial markets. Also, Dr. Sciaraffia is actively involved with clients through conference presentations, training activities, webinars, and written market commentaries. He has been in the financial industry since 2004. Dr. Sciaraffia's previous work experience includes: Senior Researcher on the Investment Strategy Research Team at Dimensional Fund Advisors from May 2013 to June 2015, where he conducted empirical asset pricing research, wrote research papers, enhanced the design of investment strategies, and collaborated with their marketing and sales departments by delivering technical presentations to various clients; and Academic in the Finance Department at the McCombs School of Business at the University of Texas at Austin from January 2012 to May 2013 and January 2017 to present, where he focuses his research on empirical asset pricing and has taught the core Investment Management course and the Quantitative Investment Strategies course for graduate students. In addition, Dr. Sciaraffia has served as a Management Associate in the Investment Banking Division at Citigroup, member of the Market Risk Team at JP Morgan, and consultant to multiple private and public organizations.

Dr. Sciaraffia earned his PhD in Business Administration from the Haas School of Business at the University of California, Berkeley. In addition, he has an MA in Mathematics with an emphasis in stochastic processes and an MS in Business from the University of California, Berkeley, an MBA and an MS in Finance from the University of Chile, and a BS in Economics and Management from the Catholic University of Chile.

Dr. Glenn Freed.

Dr. Freed is part of the team responsible for the research, design and implementation of our investment strategies. Also, Dr. Freed provides oversight of the marketing initiatives and interacting with clients. Dr. Freed is a highly trained academic with extensive investment management experience in the financial services industry. Dr. Freed has over 30 years of work experience in asset management, wealth management, tax advising, tax and accounting research and education. Before joining Acclivity Investment Research, Dr. Freed held senior positions at several financial services companies: Chief Investment Officer at LourdMurray; Chief Executive Officer and Chief Investment Officer at Vericimetry Advisors; and Vice President at Dimensional Fund Advisors. Dr. Freed delivered customized quantitative investment solutions to both financial advisors and institutional clients. Previously, Dr. Freed was Associate Dean of the Leventhal School of Accounting and Academic Director of the Master of Business Taxation Program at the University of Southern California.

Dr. Freed earned his B.S. from the University of Florida and Ph.D. in Accounting from University of Southern California. Dr. Freed is a licensed CPA in the State of Florida.

Yuxing Zhang.

Yuxing Zhang, FRM, is a Quantitative Researcher and Portfolio Manager at Innealta, where he applies his background in finance and mathematics to a wide variety of research projects that Innealta undertakes to improve every step of its investment process, from research on drivers of returns to portfolio design, portfolio management, and trading. In addition, he provides thought leadership to clients and prospectuses on important investment-related topics. Mr. Zhang is also a member of the Investment Committee, and he has worked in the financial services industry since 2014.

Mr. Zhang joined Innealta in October 2018 in connection with the strategic reorganization of the Innealta Capital division (the “Innealta Division”) of AFAM Capital, Inc. (“AFAM”), which he joined in June 2017. Mr. Zhang began working at Innealta as a quantitative research analyst. He conducted quantitative analysis used to explain strategies and performance to clients.

Mr. Zhang earned his M.S. in Financial Mathematics from the University of Chicago, a B.S. degree in Applied Mathematics, and a B.A. in Economics from the Southwestern University of Finance and Economics in Chengdu, China. In addition, Mr. Zhang holds Financial Risk Management (FRM) designation

Other Accounts Managed by the Portfolio Managers

The table below identifies, for the Portfolio Managers of the Funds, the number of accounts managed (excluding the Funds) and the total assets in such accounts, within each of the following categories: registered investment companies, other pooled investment vehicles, and other accounts. To the extent that the advisory fees for any of these accounts are based on account performance, this information is reflected in separate tables below. Asset amounts are approximate as of the date of this SAI, and have been rounded. The following table lists the number and types of accounts managed.

As of December 31, 2022, Dr. Sciaraffia, Dr. Freed and Mr. Zhang were responsible for the management of the following types of accounts in addition to the Funds:

Portfolio Manager	Registered Investment Companies (excluding the Funds)		Other Pooled Investment Vehicles		Other Accounts	
	Number of Accounts	Total Assets in the Accounts	Number of Accounts	Total Assets in the Accounts	Number of Accounts	Total Assets in the Accounts
	Vito Sciaraffia	2	\$223,848,529.09	0	\$0	210
Glenn Freed	0	0	0	\$0	0	\$0
Yuxing Zhang	2	\$223,848,529.09	0	\$0	210	\$47,933,466

Material Conflicts of Interest

Actual or apparent material conflicts of interest may arise when a Portfolio Manager has day-to-day management responsibilities with respect to more than one investment account or in other circumstances. Portfolio Managers who manage other investment accounts in addition to the Fund may be presented with the potential conflicts described below.

Individual investment professionals at the Adviser manage other accounts for other clients. These accounts may include separate accounts. The Fund’s managers listed in the prospectus who are primarily responsible for the day-to-day management of the Fund (“Portfolio Managers”) generally manage accounts in several different investment styles. These accounts may have investment objectives, strategies, time horizons, tax considerations and risk profiles that differ from those of the Fund. The Portfolio Managers make investment decisions for each account, including the Fund, based on the investment objectives, policies, practices, benchmarks, cash flows, tax and other relevant investment considerations applicable to that account. Consequently, the Portfolio Managers may purchase or sell securities for one account and not another account, and the performance of securities purchased for one account may vary from the performance of securities purchased for other accounts. Alternatively, these accounts may be managed in a similar fashion to the Fund and thus the accounts may have similar, and in some cases nearly identical, objectives, strategies and/or holdings to that of the Fund.

The Adviser offers separately managed accounts and other investment fund products in addition to the Fund. Some of these offerings include portfolios of investments which may be substantially identical to the Fund, which could create certain conflicts of interest. As the Fund and any separate accounts or investment funds managed similarly to the Fund will be managed concurrently, all transactions will be implemented according to the Adviser’s trade allocation procedures. These procedures, among other things, ensure that all trades allocated to advisory clients (including the Fund) fulfill the Adviser’s fiduciary duty to each client and otherwise allocate securities on a basis that is fair and nondiscriminatory. Such procedures are generally applied in numerous instances, including, among other things, block and bunched trades, cross transactions and private placements. In determining a fair allocation, the Adviser takes into account a number of factors, including among other things, the Adviser’s fiduciary duty to each client, any potential conflicts of interest, the size of the transaction, the relative size of a client’s portfolio, cash available for investment, suitability as well as each client’s investment objectives.

Through common control, the Adviser is affiliated with Acclivity Investment Research, LLC. Acclivity is the factor-based investment division of the Adviser. Acclivity is not engaged in the business of advising others and only advises the Adviser as the factor-based investment division of the Adviser. The Adviser and Acclivity currently share the same physical location and supervised persons. Pursuant to a partnership agreement (the “Acclivity Agreement”) between the Adviser and Acclivity, Acclivity provides the Adviser’s investment team academic research services that assist the Adviser in the development, management, and distribution of strategic beta strategies for the Adviser’s advisory clients. Such services also include providing the Adviser certain investment, marketing, and sales related intellectual property, such as strategy algorithms, trading models, simulations, code, and market research (collectively, “Acclivity Intellectual Data”). Acclivity possesses extensive capabilities in the design and implementation of quantitative strategies, which together with the Adviser’s experience constructing factor-based portfolios, allows the

Adviser to offer unique institutional-quality investment solutions previously not broadly available in the marketplace. The two primary principal indirect owners of Acclivity are Dr. Vito A. Sciaraffia, through Riomaggiore Investments, LLC as its sole member, and Dr. Gonzalo E. Maturana, through Alsacia Investments, LLC, as its sole member. Dr. Sciaraffia has a seventy (70%) indirect ownership, Dr. Maturana has a nine percent (9%) indirect ownership, and certain supervised persons of the Adviser collectively have a sixteen percent (16%) ownership of Acclivity. Acclivity's officers and senior management team is comprised of the same individuals as the Adviser's Senior Management Team.

Pursuant to a partnership agreement between Acclivity and Syntax Advisors, LLC ("Syntax"), an investment adviser registered with the SEC, Syntax provides Acclivity classification technology data (i.e., code) that when combined with Acclivity's academic research data enables Acclivity the ability to further measure company related business risk that assists Acclivity in designing quantitative driven, factor-based models that are stratified, diversified, or powered utilizing a diversification overlay. Additionally, Acclivity and Syntax collaborate on the design, launch, management, and marketing of certain factor-based investment strategies. In addition to being part of the team responsible for the research, design and implementation of Acclivity's strategic beta investment strategies, Dr. Glenn Freed serves as a member of the Adviser's Investment Committee and Portfolio Manager to the Acclivity Small Cap Value Fund and the Acclivity Mid Cap Multi-Style Fund. Furthermore, Dr. Freed serves as Chief Investment Strategist and Portfolio Manager to Syntax.

Certain inherent conflicts of interest arise from the fact that: (i) Acclivity provides the Adviser Acclivity Intellectual Data that assist the Adviser in the development, management, and distribution of strategic beta strategies for the Adviser's advisory clients; (ii) Acclivity and Syntax collaborate on the design, launch, management, and marketing of certain factor-based investment strategies; (iii) the Adviser and Syntax are both engaged in the business of providing investment advisory services; (iv) the investment strategies employed by the Adviser for its current and future clients and by Syntax for its current and future advisory clients could conflict with the strategies employed by the Adviser for current and future clients, and may affect the prices and availability of the securities and other assets in which such clients invest; (v) Dr. Freed is an access person of both the Adviser and Syntax may advise clients with conflicting investment objectives or strategies, and may provide investment advisory services to clients that also may have overlapping investment objectives; and (vi) Dr. Freed's time and effort will not be devoted exclusively to the Adviser's business or the business of its clients but will be allocated among the Adviser, its clients, Acclivity and its business, Syntax and its advisory clients.

In general, the Adviser expects to conduct its activities in a manner that is separate and independent from the activities of Acclivity. However, as stated above, the Adviser's principals and supervised persons, including the Adviser's Investment Committee, provide services and engage in various activities with respect to Acclivity and its business activities. Such activities could conflict with the transactions and strategies employed by the Adviser and its supervised persons in managing clients and could raise various other actual or potential conflicts of interest. Moreover, the time and effort of the Adviser's principals, Investment Committee members and other investment personnel and various other employees will not be devoted exclusively to the Adviser's business or the business of its clients but will be allocated among the Adviser, its clients and Acclivity and its business.

The Adviser seeks to address these and other conflicts of interest by providing in its Code of Ethics that all supervised persons have a duty to act in the best interests of each client and by providing training to supervised persons with respect to conflicts of interest and how such conflicts are resolved under the Adviser's written policies and procedures.

Portfolio Managers' Compensation

The following section describes the structure of, and the methods used to determine the different types of compensation (e.g., salary, bonus, deferred compensation, retirement plans and arrangements) for the Funds' portfolio manager as of the most recent practicable date.

The portfolio manager is compensated with a base salary which is determined by individual and firm-wide performance as well as an annual incentive bonus.

Portfolio Managers' Ownership of the Funds

The following table shows the dollar range of equity securities beneficially owned by the Portfolio Managers of the Funds as of December 31, 2022:

Name of Portfolio Manager	Dollar Range of Equity Securities in Managed Fund
Vito Sciaraffia	\$500k ~ \$1 million
Glenn Freed	\$500k ~ \$1m
Yuxing Zhang	\$0 ~ \$10k

Other Service Providers

Administrator

Pursuant to a Fund Services Agreement (the "Administration Service Agreement"), Ultimus Fund Solutions, LLC ("UFS"), 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022 (the "Administrator"), acts as administrator for the Funds, subject to the supervision of the Board. UFS is primarily in the business of providing administrative, fund accounting and transfer agent services to retail and institutional mutual funds. UFS is an affiliate of the Distributor. UFS may provide persons to serve as officers of the Funds. Such officers may be directors, officers or employees of UFS or its affiliates.

The Administration Service Agreement was initially approved by the Board at a meeting held on July 23-24, 2018 with respect to the Funds. The Agreement shall remain in effect for 2 years from the date of each Fund's commencement of operations, and subject to annual approval of the Board for one-year periods thereafter. The Administration Service Agreement is terminable by the Board or UFS on 60 days' prior written notice and may be assigned provided the non-assigning party provides prior written consent. This Agreement provides that in the absence of willful misfeasance, bad faith or gross negligence on the part of UFS or reckless disregard of its obligations thereunder, UFS shall not be liable for any action or failure to act in accordance with its duties thereunder.

Under the Administration Service Agreement, UFS provides facilitating administrative services, including: (i) providing services of persons competent to perform such administrative and clerical functions as are necessary to provide effective administration of the Funds; (ii) facilitating the performance of administrative and professional services to the Funds by others, including the Funds' Custodian; (iii) preparing, but not paying for, the periodic updating of the Funds' Registration Statement, Prospectuses and Statement of Additional Information in conjunction with Fund counsel, including the printing of such documents for the purpose of filings with the SEC and state securities administrators, and preparing reports to each Fund's shareholders and the SEC; (iv) preparing in conjunction with Fund counsel, but not paying for, all filings under the securities or "Blue Sky" laws of such states or countries as are designated by the Distributor, which may be required to register or qualify, or continue the registration or qualification, of the Funds and/or their shares under such laws; (v) preparing notices and agendas for meetings of the Board and minutes of such meetings in all matters required by the 1940 Act to be acted upon by the Board; and (vi) monitoring daily and periodic compliance with respect to all requirements and restrictions of the 1940 Act, the Internal Revenue Code and the Prospectus.

For the services rendered to the Funds by the Administrator, each Fund pays the Administrator the greater of an annual minimum fee or an asset based fee, which scales downward based upon net assets for fund administration, fund accounting and transfer agency services.

The tables below show the fees paid by each Fund to the Administrator for administrative services.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Fees paid to the Administrator
December 31, 2022	\$36,425
December 31, 2021	\$32,458
December 31, 2020	\$21,866

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Fees paid to the Administrator
December 31, 2022	\$22,919
December 31, 2021	\$22,391
December 31, 2020	\$15,237

Fund Accounting

UFS, pursuant to the Administration Service Agreement, provides the Funds with accounting services, including: (i) daily computation of net asset value; (ii) maintenance of security ledgers and books and records as required by the 1940 Act; (iii) production of the Funds’ listing of portfolio securities and general ledger reports; (iv) reconciliation of accounting records; (v) calculation of yield and total return for the Funds; (vi) maintaining certain books and records described in Rule 31a-1 under the 1940 Act, and reconciling account information and balances among the Funds’ custodian or Adviser; and (vii) monitoring and evaluating daily income and expense accruals, and sales and redemptions of shares of the Funds. The Fund also pays UFS for any out-of-pocket expenses.

The tables below show the fees paid by each Fund to the Administrator for fund accounting services.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Fees paid to the Administrator
December 31, 2022	\$4,855
December 31, 2021	\$1,920
December 31, 2020	\$1,250

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Fees paid to the Administrator
December 31, 2022	\$254
December 31, 2021	\$104
December 31, 2020	\$65

Transfer Agent

UFS, 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022, acts as transfer, dividend disbursing, and shareholder servicing agent for the Funds pursuant to a written agreement with the Funds. Under the agreement, UFS is responsible for administering and performing transfer agent functions, dividend distribution, shareholder administration, and maintaining necessary records in accordance with applicable rules and regulations.

The following tables show the fees paid by each Fund to the Administrator for transfer agent services.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Fees paid to the Administrator
December 31, 2022	\$27,079
December 31, 2021	\$25,039
December 31, 2020	\$26,740

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Fees paid to the Administrator
December 31, 2022	\$26,994
December 31, 2021	\$24,893
December 31, 2020	\$24,195

Custodian

U.S. Bank, National Association, 1555 North River Center Drive, Milwaukee, WI 53212, (the “Custodian”), serves as the custodian of the Funds’ assets pursuant to a Custody Agreement by and between the Custodian and the Trust on behalf of the Funds. The Custodian’s responsibilities include safeguarding and controlling the Funds’ cash and securities, handling the receipt and delivery of securities, and collecting interest and dividends on the Funds’ investments. Pursuant to the Custody Agreement, the Custodian also maintains original entry documents and books of record and general ledgers; posts cash receipts and disbursements; and records purchases and sales based upon communications from the Adviser. The Funds may employ foreign sub-custodians that are approved by the Board to hold foreign assets.

Compliance Services

Northern Lights Compliance Services, LLC (“NLCS”), 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022, an affiliate of GFS and the Distributor, provides a Chief Compliance Officer to the Trust as well as related compliance services pursuant to a consulting agreement between NLCS and the Trust. The Funds pay a compliance service fee to NLCS.

The tables below show the fees paid by each Fund to NLCS for compliance services.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Fees paid to NLCS
December 31, 2022	\$6,960
December 31, 2021	\$5,211
December 31, 2020	\$2,600

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Fees paid to NLCS
December 31, 2022	\$5,172
December 31, 2021	\$4,979
December 31, 2020	\$3,686

Legal Counsel

Alston & Bird, LLP, 950 F Street NW, Washington, D.C. 20004, serves as counsel to the Trust. Blank Rome LLP, 405 Lexington Avenue, New York, NY 10174 serves as counsel to the Independent Trustees.

Independent Registered Public Accounting Firm

Cohen & Company Ltd., 1835 Market Street, Suite 310, Philadelphia, PA 19103 serves as the independent registered public accounting firm of the Funds.

Distribution of Fund Shares

Northern Lights Distributors, LLC, located at 4221 North 203rd Street, Suite 100, Elkhorn, NE 68022 (the "Distributor") serves as the principal underwriter and national distributor for the shares of each Fund pursuant to an underwriting agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934 and each state's securities laws and is a member of FINRA. The offering of the Fund's shares are continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of Fund shares, will use reasonable efforts to facilitate the sale of the Funds' shares.

The Underwriting Agreement has an initial term of two years and will continue in effect only if such continuance is specifically approved at least annually by the Board of Trustees or by vote of a majority of the Funds' outstanding voting securities and, in either case, by a majority of the trustees who are not parties to the Underwriting Agreement or "interested persons" (as defined in the 1940 Act) of any such party. The Underwriting Agreement is terminable without penalty by the Trust on behalf of the Funds on 60 days' notice when authorized either by a majority vote of the Funds' outstanding voting securities or by vote of a majority of the Board of Trustees, including a majority of the trustees who are not "interested persons" (as defined in the 1940 Act) of the Trust, or by the Distributor on 60 days' notice, and will automatically terminate in the event of its "assignment" (as defined in the 1940 Act).

The following table sets forth the total compensation received by the Distributor for the fiscal year ended December 31, 2022:

<i>Fund</i>	<i>Net Underwriting Discounts and Commissions</i>	<i>Compensation on Redemptions and Repurchases</i>	<i>Brokerage Commissions</i>	<i>Other Compensation</i>
Acclivity Small Cap Fund Class N	\$0	\$0	\$0	*
Acclivity Small Cap Fund Class I	\$0	\$0	\$0	\$0
Acclivity Mid Cap Multi-Style Fund Class N	\$0	\$0	\$0	*
Acclivity Mid Cap Multi-Style Fund Class I	\$0	\$0	\$0	\$0

* The Distributor received \$20,430 from the Adviser as compensation for its distribution services to the Funds.

12b-1 Distribution and Shareholder Servicing Plan

As noted in the Prospectus, the Trust has adopted a Distribution and Shareholder Servicing Plan pursuant to Rule 12b-1 under the 1940 Act for each Fund's Class N shares (the "Plan") pursuant to which Class N shares of the Funds are authorized to pay fees to the Distributor for providing distribution and/or shareholder services to each Fund. Under the Plan, Class N shares of each Fund may pay a combined distribution or shareholder servicing fee at an annual rate of up to 0.25% of the average net assets of Class N shares as compensation for the Distributor providing account maintenance and/or distribution services to shareholders. Such fees are to be paid by each Fund monthly, or at such other intervals, as the Board shall determine. Such fees shall be based upon the Class N share's average daily net assets during the preceding month, and shall be calculated and accrued daily. The Funds may pay fees to the Distributor at a lesser rate, as agreed upon by the Board of the Trust and the Distributor. The Plan authorizes payments

to the Distributor as compensation for providing account maintenance services to Fund shareholders, including arranging for certain securities dealers or brokers, administrators and others (“Recipients”) to provide these services and paying compensation for these services.

The services to be provided by Recipients may include, but are not limited to, the following: assistance in the offering and sale of Fund shares and in other aspects of the marketing of the shares to clients or prospective clients of the respective recipients; answering routine inquiries concerning each Fund; assisting in the establishment and maintenance of accounts or sub-accounts in each Fund and in processing purchase and redemption transactions; making each Fund’s investment plan and shareholder services available; and providing such other information and services to investors in shares of each Fund as the Distributor or the Trust, on behalf of each Fund, may reasonably request. The distribution services shall also include any advertising and marketing services provided by or arranged by the Distributor with respect to each Fund. The Adviser may be compensated by the Distributor for its distribution and marketing efforts.

The Distributor is required to provide a written report, at least quarterly to the Board of the Trust, specifying in reasonable detail the amounts expended pursuant to the Rule 12b-1 Plan and the purposes for which such expenditures were made. Further, the Distributor will inform the Board of any Rule 12b-1 fees to be paid by the Distributor to Recipients.

The initial term of the Rule 12b-1 Plan is one year and will continue in effect from year to year thereafter, provided such continuance is specifically approved at least annually by a majority of the Board of the Trust and a majority of the Trustees who are not “interested persons” of the Trust and do not have a direct or indirect financial interest in the Rule 12b-1 Plan (“Rule 12b-1 Trustees”) by votes cast in person at a meeting called for the purpose of voting on the Rule 12b-1 Plan. The Rule 12b-1 Plan may be terminated at any time by the Trust or the Fund by vote of a majority of the Rule 12b-1 Trustees or by vote of a majority of the outstanding voting shares of the respective Fund.

The Rule 12b-1 Plan may not be amended to increase materially the amount of the Distributor’s compensation to be paid by each Fund, unless such amendment is approved by the vote of a majority of the outstanding voting securities of the affected class of the respective Fund (as defined in the 1940 Act). All material amendments must be approved by a majority of the Board of the Trust and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on a Rule 12b-1 Plan. During the term of a Rule 12b-1 Plan, the selection and nomination of non-interested Trustees of the Trust will be committed to the discretion of current non-interested Trustees. The Distributor will preserve copies of the Rule 12b-1 Plan, any related agreements, and all reports, for a period of not less than six years from the date of such document and for at least the first two years in an easily accessible place.

Any agreement related to the Rule 12b-1 Plan will be in writing and provide that: (a) it may be terminated by the Trust or the applicable Fund at any time upon sixty days’ written notice, without the payment of any penalty, by vote of a majority of the Rule 12b-1 Trustees, or by vote of a majority of the outstanding voting securities of the Trust or Fund; (b) it will automatically terminate in the event of its assignment (as defined in the 1940 Act); and (c) it will continue in effect for a period of more than one year from the date of its execution or adoption only so long as such continuance is specifically approved at least annually by a majority of the Board and a majority of the Rule 12b-1 Trustees by votes cast in person at a meeting called for the purpose of voting on such agreement.

To the extent these asset-based fees and other payments made under the Distribution Plan to these financial intermediaries for the distribution services they provide to each Fund’s shareholders exceed the Distribution Fees available, these payments are made by the Adviser from its own resources, which may include its profits from the advisory fee it receives from the respective Fund. In addition, each Fund may participate in various “fund supermarkets” in which a mutual fund supermarket sponsor (usually a broker-dealer) offers many mutual funds to the sponsor’s customers without charging the customers a sales charge.

In connection with its participation in such platforms, the Adviser may use all or a portion of the Distribution Fee to pay one or more supermarket sponsors a negotiated fee for distributing each Fund's shares. In addition, in its discretion, the Adviser may pay additional fees to such intermediaries from its own assets.

During the fiscal year ended December 31, 2022 the Acclivity Small Cap Value Fund and the Acclivity Mid Cap Multi-Style Fund paid the following allocated distribution fees:

Acclivity Small Cap Value Fund	
Actual 12b-1 Expenditures Paid by	
Class N Shares

During the Fiscal Year Ended December 31, 2022	
Advertising/Marketing	None
Printing/Postage	None
Payment to distributor	\$0
Payment to dealers	\$0
Compensation to sales personnel	None
Other	\$0
Total	\$0

Portfolio Transactions and Brokerage Allocation

Pursuant to the Advisory Agreement, the Adviser determines which securities are to be purchased and sold by the Funds and which broker-dealers are eligible to execute the Funds' portfolio transactions. Purchases and sales of securities in the OTC market will generally be executed directly with a "market-maker" unless, in the opinion of the Adviser, a better price and execution can otherwise be obtained by using a broker for the transaction.

Purchases of portfolio securities for the Funds will be effected through broker-dealers (including banks) that specialize in the types of securities that the Funds will be holding, unless better executions are available elsewhere. Dealers usually act as principal for their own accounts. Purchases from dealers will include a spread between the bid and the asked price. If the execution and price offered by more than one dealer are comparable, the order may be allocated to a dealer that has provided research or other services as discussed below.

In placing portfolio transactions, the Adviser will use reasonable efforts to choose broker-dealers capable of providing the services necessary to obtain the most favorable price and execution available. The full range and quality of services available will be considered in making these determinations, such as the size of the order, the difficulty of execution, the operational facilities of the firm involved, the firm's risk in positioning a block of securities and other factors. In those instances where it is reasonably determined that more than one broker-dealer can offer the services needed to obtain the most favorable price and execution available, consideration may be given to those broker-dealers that furnish or supply research and statistical information to the Adviser that they may lawfully and appropriately use in their investment advisory capacities, as well as provide other brokerage services in addition to execution services. The Adviser considers such information, which is in addition to and not in lieu of the services required to be performed by it under its Advisory Agreement with the Fund, to be useful in varying degrees, but of indeterminable value.

While it is each Fund's general policy to first seek to obtain the most favorable price and execution available in selecting a broker-dealer to execute portfolio transactions for the Fund, weight is also given to the ability of a broker-dealer to furnish brokerage and research services to the Fund or to the Adviser, even if the specific services are not directly useful to the Fund and may be useful to the Adviser in advising other clients. The Adviser retains the right to update this policy. In negotiating commissions with a broker or evaluating the spread to be paid to a dealer, the Fund may therefore pay a higher commission or spread than would be the case if no weight were given to the furnishing of these supplemental services, provided that the amount of such commission or spread has been determined in good faith by the Adviser to be reasonable in relation to the value of the brokerage and/or research services provided by such broker-dealer. The standard of reasonableness is to be measured in light of the Adviser's overall responsibilities to the Fund.

Investment decisions for the Funds may or may not be made independently from those of other client accounts of the Adviser. In certain instances, investment decisions will be made similar to other accounts managed. In the case where the Funds use similar strategies, applicable procedures will be taken to ensure trading allocations will be handled fairly and abide by all appropriate rules and regulations. Nevertheless, it is possible that at times identical securities will be acceptable for both the Funds and one or more of such client accounts. In such event, the position of the Funds and such client account(s) in the same issuer may vary and the length of time that each may choose to hold its investment in the same issuer may likewise vary. However, to the extent any of these client accounts seek to acquire the same security as the Funds at the same time, the Fund may not be able to acquire as large a portion of such security as it desires, or it may have to pay a higher price or obtain a lower yield for such security. Similarly, the Fund may not be able to obtain as high a price for, or as large an execution of, an order to sell any particular security at the same time. If one or more of such client accounts simultaneously purchases or sells the same security that the Fund is purchasing or selling, each day's transactions in such security will be allocated between the Fund and all such client accounts in a manner deemed equitable by the Adviser, taking into account the respective sizes of the accounts and the amount being purchased or sold. It is recognized that in some cases this system could have a detrimental effect on the price or value of the security insofar as the Fund is concerned. In other cases, however, it is believed that the ability of the Fund to participate in volume transactions may produce better executions for the Fund. Notwithstanding the above, the Adviser may execute buy and sell orders for accounts and take action in performance of their duties with respect to any of their accounts that may differ from actions taken with respect to another account, so long as the Adviser shall, to the extent practical, allocate investment opportunities to accounts, including the Fund, over a period of time on a fair and equitable basis and in accordance with applicable law. Whenever possible, all trades are done in a block with allocations made on a pro-rata basis. Each client will participate in the transaction at an average price, allocated in a pro-rata amount based on the asset size of the account.

The Funds are required to identify any securities of its "regular brokers or dealers" that the Funds have acquired during its most recent fiscal year. The Funds are also required to identify any brokerage

transactions during its most recent fiscal year that were directed to a broker because of research services provided, along with the amount of any such transactions and any related commissions paid by the Fund.

Brokers or dealers executing a portfolio transaction on behalf of the Fund may receive a commission in excess of the amount of commission another broker or dealer would have charged for executing the transaction if the Adviser determines in good faith that such commission is reasonable in relation to the value of brokerage, research and other services provided to the Fund. In allocating portfolio brokerage, the Adviser may select brokers or dealers who also provide brokerage, research and other services to other accounts over which the Adviser exercises investment discretion. Some of the services received as the result of Fund transactions may primarily benefit accounts other than the Fund, while services received as the result of portfolio transactions effected on behalf of those other accounts may primarily benefit the Fund.

The tables below show the broker commissions paid by each Fund during the years indicated.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Brokerage Commissions
December 31, 2022	\$414
December 31, 2021	\$115
December 31, 2020	\$180

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Brokerage Commissions
December 31, 2022	\$4
December 31, 2021	\$2
December 31, 2020	\$3

Portfolio Turnover

Although the Funds generally will not invest for short-term trading purposes, portfolio securities may be sold without regard to the length of time they have been held when, in the opinion of the Adviser, investment considerations warrant such action. Portfolio turnover rate is calculated by dividing (i) the lesser of purchases or sales of portfolio securities for the fiscal year by (ii) the monthly average of the value of portfolio securities owned during the fiscal year. A 100% turnover rate would occur if all the securities in the Fund's portfolio, with the exception of securities whose maturities at the time of acquisition were one year or less, were sold and either repurchased or replaced within one year. A high rate of portfolio turnover (100% or more) generally leads to above-average transaction costs, could generate capital gains that must be distributed to shareholders as short-term capital gains taxed at ordinary income tax rates (currently as high as 37%) and could increase brokerage commission costs. To the extent that the Fund experiences an increase in brokerage commissions due to a higher portfolio turnover rate, the performance of the Funds could be negatively impacted by the increased expenses incurred by the Funds and may result in a greater number of taxable transactions.

The tables below show the portfolio turnover rate for each Fund during the years indicated.

Acclivity Small Cap Value Fund

Fiscal Year Ended	Portfolio Turnover
December 31, 2022	59%
December 31, 2021	60%

Acclivity Mid Cap Multi-Style Fund

Fiscal Year Ended	Portfolio Turnover
December 31, 2022	27%
December 31, 2021	40%

Code of Ethics

The Funds, the Adviser, and the Distributor have each adopted Codes of Ethics under Rule 17j-1 of the 1940 Act. These Codes permit, subject to certain conditions, personnel of the Adviser, and Distributor to invest in securities that may be purchased or held by each Fund.

Proxy Voting Procedures

The Board of Trustees has adopted Proxy Voting Policies and Procedures (“Policies”) on behalf of the Trust, which delegate the responsibility for voting proxies of securities held by each Fund to the Adviser and responsibility for voting proxies of securities held by a Fund to the Adviser, subject to the Board of Trustee’s continuing oversight. The Policies require that the Adviser vote proxies received in a manner consistent with the best interests of each Fund and its shareholders. The Policies also require the Adviser to present to the Board of Trustees, at least annually, the Adviser’s Proxy Policies and a record of each proxy voted by the Adviser on behalf of each Fund, including a report on the resolution of all proxies identified by the Adviser as involving a conflict of interest. Notwithstanding this delegation of responsibilities, however, each Fund retains the right to vote proxies relating to its portfolio securities. A copy of the Adviser’s Proxy Voting Policies is attached hereto as Appendix B.

More Information. The actual voting records relating to portfolio securities during the 12-month period ended June 30 will be available without charge, upon request, by calling toll-free, 1-800-SEC-0330 or by accessing the SEC’s website at www.sec.gov.

Anti-Money Laundering Compliance Program

The Trust has established an Anti-Money Laundering Compliance Program (the “Program”) as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (“USA PATRIOT Act”). To ensure compliance with this law, the Trust’s Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program. The Trust’s CCO serves as its Anti-Money Laundering Compliance Officer.

Procedures to implement the Program include, but are not limited to, determining that the Fund’s Distributor and Transfer Agent have established proper anti-money laundering procedures, reporting suspicious and/or fraudulent activity and a providing a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to “freeze” the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

Portfolio Holdings Information

The Trust has adopted policies and procedures that govern the disclosure of the Funds’ portfolio holdings. These policies and procedures are designed to ensure that such disclosure is in the best interests of Fund shareholders.

It is the Trust's policy to: (1) ensure that any disclosure of portfolio holdings information is in the best interest of Trust shareholders; (2) protect the confidentiality of portfolio holdings information; (3) have procedures in place to guard against personal trading based on the information; and (4) ensure that the disclosure of portfolio holdings information does not create conflicts between the interests of the Trust's shareholders and those of the Trust's affiliates.

The Funds disclose their portfolio holdings by mailing the annual and semi-annual reports to shareholders approximately two months after the end of the fiscal year and semi-annual period. In addition, the Funds disclose their portfolio holdings reports on Forms N-CSR and Form N-PORT two months after the end of each quarter/semi-annual period.

The Funds may choose to make portfolio holdings information available to rating agencies such as Lipper, Morningstar or Bloomberg earlier and more frequently on a confidential basis.

Under limited circumstances, as described below, the Funds' portfolio holdings may be disclosed to, or known by, certain third parties in advance of their filing with the Securities and Exchange Commission on Form N-CSR or Form N-PORT. In each case, a determination has been made that such advance disclosure is supported by a legitimate business purpose and that the recipient is subject to a duty to keep the information confidential. The recipient is also subjected to a duty not to trade on the information.

The Adviser. Personnel of the Adviser, including personnel responsible for managing the Funds' portfolio, may have full daily access to Fund portfolio holdings since that information is necessary in order for the Adviser to provide their management, administrative, and investment services to the Funds. As required for purposes of analyzing the impact of existing and future market changes on the prices, availability, demand and liquidity of such securities, as well as for the assistance of portfolio managers in the trading of such securities, Adviser personnel may also release and discuss certain portfolio holdings with various broker-dealers.

Ultimus Fund Solutions, LLC. Ultimus Fund Solutions, LLC is the transfer agent, fund accountant and administrator for the Funds; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Northern Lights Compliance Services, LLC. Northern Lights Compliance Services, LLC provides consulting services to the Funds as well as related compliance services; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

U.S. Bank, National Association. U.S. Bank, National Association is custodian for the Funds; therefore, its personnel have full daily access to the Funds' portfolio holdings since that information is necessary in order for them to provide the agreed-upon services for the Trust.

Cohen & Company Ltd.. Cohen & Company, Ltd. is the Funds' independent registered public accounting firm; therefore, its personnel have access to the Fund's portfolio holdings in connection with auditing of the Funds' annual financial statements.

Alston & Bird, LLP. Alston & Bird, LLP is counsel to the Trust; therefore, its personnel have access to the Funds' portfolio holdings in connection with review of the Fund's annual and semi-annual shareholder reports and SEC filings.

Blank Rome LLP. Blank Rome LLP is counsel to the Independent Trustees.

Additions to List of Approved Recipients

The Trust's Chief Compliance Officer is the person responsible, and whose prior approval is required, for any disclosure of the Funds' portfolio securities at any time or to any persons other than those described above. In such cases, the recipient must have a legitimate business need for the information and must be subject to a duty to keep the information confidential. There are no ongoing arrangements in place with respect to the disclosure of portfolio holdings. In no event shall the Funds, the Adviser, or any other party receive any direct or indirect compensation in connection with the disclosure of information about the Funds' portfolio holdings.

Compliance With Portfolio Holdings Disclosure Procedures

The Trust's Chief Compliance Officer will report periodically to the Board with respect to compliance with the Funds' portfolio holdings disclosure procedures, and from time to time will provide the Board any updates to the portfolio holdings disclosure policies and procedures.

There is no assurance that the Trust's policies on disclosure of portfolio holdings will protect the Funds from the potential misuse of holdings information by individuals or firms in possession of that information.

Determination of Net Asset Value

As indicated in the Prospectus under the heading "Share Price," the net asset value ("NAV") of the Funds' shares, by class, is determined by dividing the total value of the Funds' portfolio investments and other assets, less any liabilities, by the total number of shares outstanding of the Fund, by class.

Generally, the Funds' domestic securities (including underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges) are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. The Board has appointed the Adviser as its designee (the "Valuation Designee") for all fair value determinations and responsibilities, other than overseeing pricing service providers used by the Trust. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith by the Funds' Valuation Designee committee in accordance with procedures approved by the Board and as further described below. Securities that are not traded or dealt in any securities exchange (whether domestic or foreign) and for which over-the-counter market quotations are readily available generally shall be valued at the last sale price or, in the absence of a sale, at the mean between the current bid and ask price on such over-the-counter market.

Certain securities or investments for which daily market quotes are not readily available may be fair valued by the Valuation Designee, pursuant to guidelines established by the Board, with reference to other securities or indices. Debt securities not traded on an exchange may be valued at prices supplied by a pricing agent(s) based on broker or dealer supplied valuations or matrix pricing, a method of valuing securities by reference to the value of other securities with similar characteristics, such as rating, interest rate and maturity. Short-term investments having a maturity of 60 days or less may be generally valued at amortized cost when it approximated fair value.

Exchange traded options are valued at the last quoted sales price or, in the absence of a sale, at the mean between the current bid and ask prices on the exchange on which such options are traded. Futures and options on futures are valued at the settlement price determined by the exchange. Other securities for which market quotes are not readily available are valued at fair value as determined in good faith by the Valuation Designee. Swap agreements and other derivatives are generally valued daily based upon quotations from market makers or by a pricing service in accordance with the valuation procedures approved by the Board.

Under certain circumstances, the Funds may use an independent pricing service to calculate the fair market value of foreign equity securities on a daily basis by applying valuation factors to the last sale price or the mean price as noted above. The fair market values supplied by the independent pricing service will generally reflect market trading that occurs after the close of the applicable foreign markets of comparable securities or the value of other instruments that have a strong correlation to the fair-valued securities. The independent pricing service will also take into account the current relevant currency exchange rate. A security that is fair valued may be valued at a price higher or lower than actual market quotations or the value determined by other funds using their own fair valuation procedures. Because foreign securities may trade on days when Fund shares are not priced, the value of securities held by each Fund can change on days when Fund shares cannot be redeemed or purchased. In the event that a foreign security's market quotations are not readily available or are deemed unreliable (for reasons other than because the foreign exchange on which it trades closed before the Funds' calculation of NAV), the security will be valued at its fair market value as determined in good faith by the Funds' Valuation Designee in accordance with procedures approved by the Board as discussed below. Without fair valuation, it is possible that short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Funds' portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that it will prevent dilution of each Fund's NAV by short-term traders. In addition, because the Funds may invest in underlying ETFs which hold portfolio securities primarily listed on foreign (non-U.S.) exchanges, and these exchanges may trade on weekends or other days when the underlying ETFs do not price their shares, the value of these portfolio securities may change on days when you may not be able to buy or sell Fund shares.

Investments initially valued in currencies other than the U.S. dollar are converted to U.S. dollars using exchange rates obtained from pricing services. As a result, the NAV of each Fund's shares may be affected by changes in the value of currencies in relation to the U.S. dollar. The value of securities traded in markets outside the United States or denominated in currencies other than the U.S. dollar may be affected significantly on a day that the New York Stock Exchange is closed and an investor is not able to purchase, redeem or exchange shares.

Fund shares are valued at the close of regular trading on the New York Stock Exchange (normally 4:00 p.m., Eastern time) (the "NYSE Close") on each day that the New York Stock Exchange is open. For purposes of calculating the NAV, the Funds normally use pricing data for domestic equity securities received shortly after the NYSE Close and do not normally take into account trading, clearances or settlements that take place after the NYSE Close. Domestic fixed income and foreign securities are normally priced using data reflecting the earlier closing of the principal markets for those securities. Information that becomes known to the Funds or their agents after the NAV has been calculated on a particular day will not generally be used to retroactively adjust the price of the security or the NAV determined earlier that day.

When market quotations are not readily available or deemed unreliable, the Funds may value securities at fair value or estimate their value as determined in good faith by the Valuation Designee, pursuant to procedures approved by the Board. Fair valuation may also be used by the Valuation Designee if extraordinary events occur after the close of the relevant market but prior to the NYSE Close.

The Trust expects that the holidays upon which the Exchange will be closed are as follows: New Year's Day, Martin Luther King, Jr. Day, President's Day, Good Friday, Memorial Day, Juneteenth, Independence Day, Labor Day, Thanksgiving Day, and Christmas Day.

Purchase of Shares

Orders for shares received by the Funds in good order prior to the close of business on the NYSE on each day during such periods that the NYSE is open for trading are priced at NAV per share computed as of the close of the regular session of trading on the NYSE. Orders received in good order after the close of the NYSE, or on a day it is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined NAV or offering price per share.

Redemption of Shares

Each Fund will redeem all or any portion of a shareholder's shares in the Fund when requested in accordance with the procedures set forth in the "Redemptions" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

- (a) when the NYSE is closed, other than customary weekend and holiday closings;
- (b) when trading on that exchange is restricted for any reason;
- (c) when an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably practicable for the Fund to fairly determine the value of its net assets, provided that applicable rules and regulations of the SEC (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or
- (d) when the SEC by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

The Funds may purchase shares of certain series which charge a redemption fee to shareholders that redeem shares of the underlying fund within a certain period of time (such as one year). The fee is payable to the underlying fund. Accordingly, if a Fund were to invest in an underlying fund and incur a redemption fee as a result of redeeming shares in such underlying fund, the Fund would bear such redemption fee. The Funds will not, however, invest in shares of an underlying fund that is sold with a contingent deferred sales load.

Supporting documents in addition to those listed under "Redemptions" in the Prospectus will be required from executors, administrators, Trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, Trust instruments, certificates of death, appointments as executor, certificates of corporate authority and waiver of tax required in some states when settling estates.

Under section 72.1021(a) of the Texas Property Code, initial investors in a Fund who are Texas residents may designate a representative to receive notices of abandoned property in connection with Fund shares. Texas shareholders who wish to appoint a representative should notify the Trust's Transfer Agent by writing to the address below to obtain a form for providing written notice to the Trust:

c/o Ultimus Fund Solutions, LLC
4221 North 203rd Street, Suite 100
Elkhorn, Nebraska 68022

Tax Status

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. The tax considerations relevant to a specific shareholder depend upon its specific circumstances, and the following general summary does not attempt to discuss all potential tax considerations that could be relevant to a prospective shareholder with respect to the Funds or their investments. This general summary is based on the Internal Revenue Code of 1986, as amended (the “Code”), the Federal Income Tax Regulations promulgated thereunder, and administrative and judicial interpretations thereof as of the date hereof, all of which are subject to change (potentially on a retroactive basis).

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Code. All shareholders should consult a qualified tax advisor regarding their investment in a Fund.

Each Fund has qualified and intends to continue to qualify and has elected to be treated as a regulated investment company under Subchapter M of the Code, which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, each Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of each Fund will be computed in accordance with Section 852 of the Code. The Internal Revenue Service (“IRS”) issued a number of private letter rulings to other mutual funds (unrelated to the Fund), indicating that certain income from a fund’s investment in a wholly-owned foreign subsidiary constituted “qualifying income” for purposes of Subchapter M. However, the IRS suspended issuance of these letter rulings in 2011 pending a review of its position, and in 2016 declared that it would no longer issue private letter rulings on this issue. If the IRS were to change its position with respect to the conclusions reached in these private letter rulings (which change in position might be applied to the Fund retroactively), the income from the Fund’s investment in the Subsidiary might not be qualifying income, and the Fund might not qualify as a regulated investment company for one or more years.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of each Fund. Under the Regulated Investment Company Act of 2010, each Fund will be permitted to carry forward capital losses incurred in taxable years beginning after December 22, 2010 for an unlimited period. However, losses incurred during those future years will be required to be utilized prior to the losses incurred in pre-enactment tax years. Thus, pre-enactment capital loss carryforwards may be more likely to expire unused. Additionally, post-enactment capital losses that are carried forward will retain their character as either short-term or long-term capital losses rather than being considered all short-term as under previous law.

At December 31, 2022, the Funds had capital loss carry forwards for federal income tax purposes available to offset future capital gains as follows:

	<u>Expiring</u>	<u>Non-Expiring Short-Term</u>	<u>Non-Expiring Long-Term</u>	<u>Total</u>	<u>CLCF Utilized</u>
Mid Cap Fund	\$ —	\$ 405	\$ —	\$ 405	\$ —
Small Cap Fund	—	—	—	—	—

Each Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital

losses in accordance with the timing requirements imposed by the Code and therefore should not be required to pay any federal income or excise taxes. Distributions of net investment income and net capital gain will be made after the end of each fiscal year, and no later than December 31 of each year. Both types of distributions will be in shares of each Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Code, each Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of stock, securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such stock, securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of a Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of each Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which a Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships. Under the Regulated Investment Company Act of 2010, if a Fund fails to satisfy these qualifying income and assets tests, and such failure was due to reasonable cause and not willful neglect, it may be permitted to "cure" such failures under certain circumstances (and thereby not jeopardize its tax status as a regulated investment company) under certain circumstances.

If a Fund fails to qualify as a regulated investment company under Subchapter M of the Code in any fiscal year (and such failure is not subject to cure as discussed above), it will be treated as a corporation for federal income tax purposes. As such the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of a Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from a Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

Each Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98.2% of a Fund's ordinary income for the calendar year and at least 98% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to a Fund during the preceding calendar year. Under ordinary circumstances, each Fund expects to time its distributions so as to avoid liability for this excise tax.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income. In most cases each Fund will hold shares in Underlying Funds for less than 12 months, such that its sales of such shares from time to time will not qualify as long-term capital gains for those investors who hold shares of a Fund in taxable accounts.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as short-term capital gain; regardless of the length of time the shares of the Trust have been held by such shareholders.

A redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to reinvest distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Code, each Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax (currently at a rate of 24%) in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if a Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for a Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to a Fund, defer losses to the Fund, cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of a Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If a Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If a Fund's book income is less than taxable

income, the Fund could be required to make distributions exceeding book income to qualify as a regulated investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by a Fund in certain “passive foreign investment companies” (“PFICs”) could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, a Fund may elect to treat a PFIC as a “qualified electing fund” (“QEF”), in which case the Fund will be required to include its share of the company’s income and net capital gains annually, regardless of whether it receives any distribution from the company.

Each Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings “to the market” as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund’s taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for a Fund to avoid taxation. Making either of these elections therefore may require a Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund’s total return.

Foreign Currency Transactions

Each Fund’s transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options, futures contracts and forward contracts (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by a Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of a Fund’s total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to “pass through” to its shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by a Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of a Fund’s taxable year whether the foreign taxes paid by the Fund will “pass through” for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder’s U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of a Fund’s income will flow through to shareholders of the Fund. With respect to each Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities,

receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by a Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income, which is required to be distributed and is taxable even though a Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount (“OID”) is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by a Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the “accrued market discount” on such debt security. Market discount generally accrues in equal daily installments. A Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

In addition, the 2017 Tax Cuts and Jobs Act requires that taxpayers, such as the Funds, that use an accrual method of accounting for U.S. federal income tax purposes are generally required to include certain amounts in income no later than the time such amounts are reflected on such taxpayer’s applicable financial statements. Certain fees treated as OID may be included as income for financial statement purposes when received (as opposed to being accrued into income over the term of the debt instrument), which may thus require such amounts be treated as taxable income of a Fund upon their receipt.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by a Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, a Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

If a Fund holds the foregoing kinds of securities, it may be required to pay out as an income distribution each year an amount that is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of a Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). A Fund may realize gains or losses from such

liquidations. In the event a Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of a Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year a Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisors about the application of federal, state and local and foreign tax law in light of their particular situation.

Financial Statements

The financial statements of the Acclivity Small Cap Value Fund and the Acclivity Mid Cap Multi-Style Fund for the fiscal year ended December 31, 2022 and the report of the independent registered public accounting firm are incorporated herein by reference to the Funds' Annual Report. These financial statements include the schedules of investments, statements of assets and liabilities, statements of operations, statements of changes in net assets, financial highlights and notes. The Fund will provide the Fund's Annual Report without charge upon request in writing or by telephone.

The Acclivity Small Cap Growth Fund is not operational as of the date of this SAI and therefore does not have a financial history.

APPENDIX “A” RATINGS DEFINITIONS

Standard & Poor’s (S&P) Global Rating Definitions

An S&P Global Ratings issue credit rating is a forward-looking opinion about the creditworthiness of an obligor with respect to a specific financial obligation, a specific class of financial obligations, or a specific financial program (including ratings on medium-term note programs and commercial paper programs). It takes into consideration the creditworthiness of guarantors, insurers, or other forms of credit enhancement on the obligation and takes into account the currency in which the obligation is denominated. The opinion reflects S&P Global Ratings’ view of the obligor’s capacity and willingness to meet its financial commitments as they come due, and this opinion may assess terms, such as collateral security and subordination, which could affect ultimate payment in the event of default.

Issue credit ratings can be either long-term or short-term. Short-term ratings are generally assigned to those obligations considered short-term in the relevant market. Short-term ratings are also used to indicate the creditworthiness of an obligor with respect to put features on long-term obligations. Medium-term notes are assigned long-term ratings.

Short-Term Issue Credit Ratings

A-1

A short-term obligation rated ‘A-1’ is rated in the highest category by S&P Global Ratings. The obligor’s capacity to meet its financial commitments on the obligation is strong. Within this category, certain obligations are designated with a plus sign (+). This indicates that the obligor’s capacity to meet its financial commitments on these obligations is extremely strong.

A-2

A short-term obligation rated ‘A-2’ is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher rating categories. However, the obligor’s capacity to meet its financial commitments on the obligation is satisfactory.

A-3

A short-term obligation rated ‘A-3’ exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken an obligor’s capacity to meet its financial commitments on the obligation.

B

A short-term obligation rated ‘B’ is regarded as vulnerable and has significant speculative characteristics. The obligor currently has the capacity to meet its financial commitments; however, it faces major ongoing uncertainties that could lead to the obligor’s inadequate capacity to meet its financial commitments.

C

A short-term obligation rated ‘C’ is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation.

D

A short-term obligation rated ‘D’ is in default or in breach of an imputed promise. For non-hybrid capital instruments, the ‘D’ rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within any stated grace period. However, any stated grace period longer than five business days will be treated as five business days. The

'D' rating also will be used upon the filing of a bankruptcy petition or the taking of a similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

SPUR (S&P's Underlying Rating)

A SPUR is an opinion about the stand-alone capacity of an obligor to pay debt service on a credit-enhanced debt issue, without giving effect to the enhancement that applies to it. These ratings are published only at the request of the debt issuer or obligor with the designation SPUR to distinguish them from the credit-enhanced rating that applies to the debt issue. S&P Global Ratings maintains surveillance of an issue with a published SPUR.

Dual Ratings

Dual ratings may be assigned to debt issues that have a put option or demand feature. The first component of the rating addresses the likelihood of repayment of principal and interest as due, and the second component of the rating addresses only the demand feature. The first component of the rating can relate to either a short-term or long-term transaction and accordingly use either short-term or long-term rating symbols. The second component of the rating relates to the put option and is assigned a short-term rating symbol (for example, 'AAA/A-1+' or 'A-1+/A-1'). With U.S. municipal short-term demand debt, the U.S. municipal short-term note rating symbols are used for the first component of the rating (for example, 'SP-1+/A-1+').

Active Qualifiers

S&P Global Ratings uses the following qualifiers that limit the scope of a rating. The structure of the transaction can require the use of a qualifier such as a 'p' qualifier, which indicates the rating addresses the principal portion of the obligation only. A qualifier appears as a suffix and is part of the rating.

L

Ratings qualified with 'L' apply only to amounts invested up to federal deposit insurance limits.

P

This suffix is used for issues in which the credit factors, the terms, or both that determine the likelihood of receipt of payment of principal are different from the credit factors, terms, or both that determine the likelihood of receipt of interest on the obligation. The 'p' suffix indicates that the rating addresses the principal portion of the obligation only and that the interest is not rated.

prelim

Preliminary ratings, with the 'prelim' suffix, may be assigned to obligors or obligations, including financial programs, in the circumstances described below. Assignment of a final rating is conditional on the receipt by S&P Global Ratings of appropriate documentation. S&P Global Ratings reserves the right not to issue a final rating. Moreover, if a final rating is issued, it may differ from the preliminary rating.

- Preliminary ratings may be assigned to obligations, most commonly structured and project finance issues, pending receipt of final documentation and legal opinions.
- Preliminary ratings may be assigned to obligations that will likely be issued upon the obligor's emergence from bankruptcy or similar reorganization, based on late-stage reorganization plans, documentation, and discussions with the obligor. Preliminary ratings may also be assigned to the obligors. These ratings consider the anticipated general credit quality of the reorganized or post-bankruptcy issuer as well as attributes of the anticipated obligation(s).

- Preliminary ratings may be assigned to entities that are being formed or that are in the process of being independently established when, in S&P Global Ratings' opinion, documentation is close to final. Preliminary ratings may also be assigned to the obligations of these entities.
- Preliminary ratings may be assigned when a previously unrated entity is undergoing a well-formulated restructuring, recapitalization, significant financing, or other transformative event, generally at the point that investor or lender commitments are invited. The preliminary rating may be assigned to the entity and to its proposed obligation(s). These preliminary ratings consider the anticipated general credit quality of the obligor, as well as attributes of the anticipated obligation(s), assuming successful completion of the transformative event. Should the transformative event not occur, S&P Global Ratings would likely withdraw these preliminary ratings.
- A preliminary recovery rating may be assigned to an obligation that has a preliminary issue credit rating.

t

This symbol indicates termination structures that are designed to honor their contracts to full maturity or, should certain events occur, to terminate and cash settle all their contracts before their final maturity date.

cir

This symbol indicates a counterparty instrument rating (CIR), which is a forward-looking opinion about the creditworthiness of an issuer in a securitization structure with respect to a specific financial obligation to a counterparty (including interest rate swaps, currency swaps, and liquidity facilities). The CIR is determined on an ultimate payment basis; these opinions do not take into account timeliness of payment.

Inactive Qualifiers (Inactive Qualifiers are no longer applied or outstanding)

This symbol indicated that the rating was contingent upon S&P Global Ratings' receipt of an executed copy of the escrow agreement or closing documentation confirming investments and cash flows. Discontinued use in August 1998.

c

This qualifier was used to provide additional information to investors that the bank may terminate its obligation to purchase tendered bonds if the long-term credit rating of the issuer was lowered to below an investment-grade level and/or the issuer's bonds were deemed taxable. Discontinued use in January 2001.

G

The letter 'G' followed the rating symbol when a fund's portfolio consisted primarily of direct U.S. government securities

pi

This qualifier was used to indicate ratings that were based on an analysis of an issuer's published financial information, as well as additional information in the public domain. Such ratings did not, however, reflect in-depth meetings with an issuer's management and therefore could have been based on less comprehensive information than ratings without a 'pi' suffix. Discontinued use as of December 2014 and as of August 2015 for Lloyd's Syndicate Assessments.

pr

The letters 'pr' indicate that the rating was provisional. A provisional rating assumed the successful completion of a project financed by the debt being rated and indicates that payment of debt service requirements was largely or entirely dependent upon the successful, timely completion of the project. This

rating, however, while addressing credit quality subsequent to completion of the project, made no comment on the likelihood of or the risk of default upon failure of such completion.

q

A 'q' subscript indicates that the rating is based solely on quantitative analysis of publicly available information. Discontinued use in April 2001.

r

The 'r' modifier was assigned to securities containing extraordinary risks, particularly market risks, that are not covered in the credit rating. The absence of an 'r' modifier should not be taken as an indication that an obligation would not exhibit extraordinary noncredit-related risks. S&P Global Ratings discontinued the use of the 'r' modifier for most obligations in June 2000 and for the balance of obligations (mainly structured finance transactions) in November 2002.

Moody's Credit Ratings Definitions

Purpose

The system of rating securities was originated by John Moody in 1909. The purpose of Moody's ratings is to provide investors with a simple system of gradation by which future relative creditworthiness of securities may be gauged.

Rating Symbols

Gradations of creditworthiness are indicated by rating symbols, with each symbol representing a group in which the credit characteristics are broadly the same. There are nine symbols as shown below, from that used to designate least credit risk to that denoting greatest credit risk:

Aaa Aa A Baa Ba B Caa Ca C

Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa.

Absence of a Rating

Where no rating has been assigned or where a rating has been withdrawn, it may be for reasons unrelated to the creditworthiness of the issue.

Should no rating be assigned, the reason may be one of the following:

1. An application was not received or accepted.
2. The issue or issuer belongs to a group of securities or entities that are not rated as a matter of policy.
3. There is a lack of essential data pertaining to the issue or issuer.
4. The issue was privately placed, in which case the rating is not published in Moody's publications.

Withdrawal may occur if new and material circumstances arise, the effects of which preclude satisfactory analysis; if there is no longer available reasonable up-to-date data to permit a judgment to be formed; if a bond is called for redemption; or for other reasons.

Changes in Rating

The credit quality of most issuers and their obligations is not fixed and steady over a period of time, but tends to undergo change. For this reason changes in ratings occur so as to reflect variations in the intrinsic relative position of issuers and their obligations.

A change in rating may thus occur at any time in the case of an individual issue. Such rating change should serve notice that Moody's observes some alteration in creditworthiness, or that the previous rating did not fully reflect the quality of the bond as now seen. While because of their very nature, changes are to be expected more frequently among bonds of lower ratings than among bonds of higher ratings. Nevertheless, the user of bond ratings should keep close and constant check on all ratings — both high and low — to be able to note promptly any signs of change in status that may occur.

Limitations to Uses of Ratings*

Obligations carrying the same rating are not claimed to be of absolutely equal credit quality. In a broad sense, they are alike in position, but since there are a limited number of rating classes used in grading thousands of bonds, the symbols cannot reflect the same shadings of risk which actually exist.

As ratings are designed exclusively for the purpose of grading obligations according to their credit quality, they should not be used alone as a basis for investment operations. For example, they have no value in

forecasting the direction of future trends of market price. Market price movements in bonds are influenced not only by the credit quality of individual issues but also by changes in money rates and general economic trends, as well as by the length of maturity, etc. During its life even the highest rated bond may have wide price movements, while its high rating status remains unchanged.

The matter of market price has no bearing whatsoever on the determination of ratings, which are not to be construed as recommendations with respect to “attractiveness”. The attractiveness of a given bond may depend on its yield, its maturity date or other factors for which the investor may search, as well as on its credit quality, the only characteristic to which the rating refers.

Since ratings involve judgements about the future, on the one hand, and since they are used by investors as a means of protection, on the other, the effort is made when assigning ratings to look at “worst” possibilities in the “visible” future, rather than solely at the past record and the status of the present. Therefore, investors using the rating should not expect to find in them a reflection of statistical factors alone, since they are an appraisal of long-term risks, including the recognition of many non-statistical factors.

Though ratings may be used by the banking authorities to classify bonds in their bank examination procedure, Moody’s ratings are not made with these bank regulations in mind. Moody’s Investors Service’s own judgement as to the desirability or non-desirability of a bond for bank investment purposes is not indicated by Moody’s ratings.

Moody’s ratings represent the opinion of Moody’s Investors Service as to the relative creditworthiness of securities. As such, they should be used in conjunction with the descriptions and statistics appearing in Moody’s publications. Reference should be made to these statements for information regarding the issuer. Moody’s ratings are not commercial credit ratings. In no case is default or receivership to be imputed unless expressly stated.

*As set forth more fully on the copyright, credit ratings are, and must be construed solely as, statements of opinion and not statements of fact or recommendations to purchase, sell or hold any securities. Each rating or other opinion must be weighed solely as one factor in any investment decision made by or on behalf of any user of the information, and each such user must accordingly make its own study and evaluation of each security and of each issuer and guarantor of, and each provider of credit support for, each security that it may consider purchasing, selling or holding.

Short-Term Ratings

P-1

Issuers (or supporting institutions) rated Prime-1 have a superior ability to repay short-term debt obligations.

P-2

Issuers (or supporting institutions) rated Prime-2 have a strong ability to repay short-term debt obligations.

P-3

Issuers (or supporting institutions) rated Prime-3 have an acceptable ability to repay short-term obligations.

NP

Issuers (or supporting institutions) rated Not Prime do not fall within any of the Prime rating categories.

Short-term vs. Long-term Ratings

Long Term	Short Term
Investment Grade Aaa Aa1 Aa2 Aa3 A1 A2 A3 Baa1 Baa2 Baa3	Prime-1 Prime-2 Prime-3
Speculative Grade Ba1 Ba2 Ba3 B1 B2 B3 Caa1 Caa2 Caa3 Ca C	Not Prime

Fitch's National Credit Ratings

National scale ratings are an opinion of creditworthiness relative to the universe of issuers and issues within a single country. They are most commonly used in emerging market countries with sub- or low investment grade sovereign ratings on the international scale.

As creditworthiness can be expressed across the full range of the scale, a national scale can enable greater rating differentiation within a market than the international scale, particularly in highly speculative grade countries where ratings tend to cluster around the often low sovereign rating due to higher risks associated with a more volatile operating environment.

A “+” or “-” may be appended to a National Rating to denote relative status within a major rating category. Such suffixes are not added to the ‘AAA(xxx)’ National Rating category, to categories below ‘CCC(xxx)’, or to Short-Term National Ratings other than ‘F1(xxx)’.

National scale ratings are assigned on the basis that the “best credits or issuers” in the country are rated ‘AAA’ on the national scale. National Ratings are then assessed using the full range of the national scale based on a comparative analysis of issuers rated under the same national scale to establish a relative ranking of credit worthiness.

At any given point in time, there is a certain relationship between National and International Ratings but there is not a precise translation between the scales. Fitch monitors the ratings relationship of issuers rated on both the international and national scales to ensure the consistency of rating relativities across scales. In other words, if issuer “X” is rated higher than issuer “Y” on one scale, issuer “X” cannot be rated lower than issuer “Y” on the other scale.

National Ratings for local issuers exclude the effects of sovereign and transfer risk and exclude the possibility that investors may be unable to repatriate any due interest and principal repayments. Comparisons between different national scales or between an individual national scale and the international rating scale are therefore inappropriate and potentially misleading.

In certain countries, regulators have established credit rating scales to be used within their domestic markets using specific nomenclature. In these countries, the agency’s National Rating definitions may be substituted by the regulatory scales. For instance Fitch’s National Short Term Ratings of ‘F1+(xxx)’, ‘F1(xxx)’, ‘F2(xxx)’ and ‘F3(xxx)’ may be substituted by the regulatory scales, e.g. ‘A1+’, ‘A1’, ‘A2’ and ‘A3’. The below definitions thus serve as a template, but users should consult the individual scales for each country listed on Fitch’s regional websites to determine if any additional or alternative category definitions apply.

National Short-Term Credit Ratings

F1(xxx)

Indicates the strongest capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Under the agency’s National Rating scale, this rating is assigned to the lowest default risk relative to others in the same country. Where the liquidity profile is particularly strong, a “+” is added to the assigned rating.

F2(xxx)

Indicates a good capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. However, the margin of safety is not as great as in the case of the higher ratings.

F3(xxx)

Indicates an adequate capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. However, such capacity is more susceptible to near-term adverse changes than for financial commitments in higher rated categories.

B(xxx)

Indicates an uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Such capacity is highly susceptible to near-term adverse changes in financial and economic conditions.

C(xxx)

Indicates a highly uncertain capacity for timely payment of financial commitments relative to other issuers or obligations in the same country. Capacity for meeting financial commitments is solely reliant upon a sustained, favorable business and economic environment.

RD(xxx): Restricted default.

Indicates an entity that has defaulted on one or more of its financial commitments, although it continues to meet other financial obligations. Applicable to entity ratings only.

D(xxx)

Indicates actual or imminent payment default.

Notes to Long-Term and Short-Term National Ratings:

The ISO International Country Code is placed in parentheses immediately following the rating letters to indicate the identity of the National market within which the rating applies. For illustrative purposes, (xxx) has been used.

LONG-TERM RATINGS

S&P's Long-Term Issue Credit Ratings

Issue credit ratings are based, in varying degrees, on S&P Global Ratings' analysis of the following considerations:

- The likelihood of payment--the capacity and willingness of the obligor to meet its financial commitments on an obligation in accordance with the terms of the obligation;
- The nature and provisions of the financial obligation, and the promise we impute; and
- The protection afforded by, and relative position of, the financial obligation in the event of a bankruptcy, reorganization, or other arrangement under the laws of bankruptcy and other laws affecting creditors' rights.

Issue ratings are an assessment of default risk but may incorporate an assessment of relative seniority or ultimate recovery in the event of default. Junior obligations are typically rated lower than senior obligations, to reflect the lower priority in bankruptcy, as noted above. (Such differentiation may apply when an entity has both senior and subordinated obligations, secured and unsecured obligations, or operating company and holding company obligations.)

AAA

An obligation rated 'AAA' has the highest rating assigned by S&P Global Ratings. The obligor's capacity to meet its financial commitments on the obligation is extremely strong.

AA

An obligation rated 'AA' differs from the highest-rated obligations only to a small degree. The obligor's capacity to meet its financial commitments on the obligation is very strong.

A

An obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitments on the obligation is still strong.

BBB

An obligation rated 'BBB' exhibits adequate protection parameters. However, adverse economic conditions or changing circumstances are more likely to weaken the obligor's capacity to meet its financial commitments on the obligation.

BB, B, CCC, CC, and C

Obligations rated 'BB', 'B', 'CCC', 'CC', and 'C' are regarded as having significant speculative characteristics. 'BB' indicates the least degree of speculation and 'C' the highest. While such obligations will likely have some quality and protective characteristics, these may be outweighed by large uncertainties or major exposure to adverse conditions.

BB

An obligation rated 'BB' is less vulnerable to nonpayment than other speculative issues. However, it faces major ongoing uncertainties or exposure to adverse business, financial, or economic conditions that could lead to the obligor's inadequate capacity to meet its financial commitments on the obligation.

B

An obligation rated 'B' is more vulnerable to nonpayment than obligations rated 'BB', but the obligor currently has the capacity to meet its financial commitments on the obligation. Adverse business, financial, or economic conditions will likely impair the obligor's capacity or willingness to meet its financial commitments on the obligation.

CCC

An obligation rated 'CCC' is currently vulnerable to nonpayment and is dependent upon favorable business, financial, and economic conditions for the obligor to meet its financial commitments on the obligation. In the event of adverse business, financial, or economic conditions, the obligor is not likely to have the capacity to meet its financial commitments on the obligation.

CC

An obligation rated 'CC' is currently highly vulnerable to nonpayment. The 'CC' rating is used when a default has not yet occurred but S&P Global Ratings expects default to be a virtual certainty, regardless of the anticipated time to default.

C

An obligation rated 'C' is currently highly vulnerable to nonpayment, and the obligation is expected to have lower relative seniority or lower ultimate recovery compared with obligations that are rated higher.

D

An obligation rated 'D' is in default or in breach of an imputed promise. For non-hybrid capital instruments, the 'D' rating category is used when payments on an obligation are not made on the date due, unless S&P Global Ratings believes that such payments will be made within five business days in the absence of a stated grace period or within the earlier of the stated grace period or 30 calendar days. The 'D' rating also will be used upon the filing of a bankruptcy petition or the taking of similar action and where default on an obligation is a virtual certainty, for example due to automatic stay provisions. An obligation's rating is lowered to 'D' if it is subject to a distressed exchange offer.

NR

This indicates that no rating has been requested, or that there is insufficient information on which to base a rating, or that S&P Global Ratings does not rate a particular obligation as a matter of policy.

* The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

See active and inactive qualifiers following S&P Short-Term Issue Credit Ratings beginning on page 46.

Moody's Long-Term Debt Ratings

Moody's Long-Term Rating Definitions:

Aaa

Obligations rated Aaa are judged to be of the highest quality, subject to the lowest level of credit risk.

Aa

Obligations rated Aa are judged to be of high quality and are subject to very low credit risk.

A

Obligations rated A are judged to be upper-medium grade and are subject to low credit risk.

Baa

Obligations rated Baa are judged to be medium-grade and subject to moderate credit risk and as such may possess certain speculative characteristics.

Ba

Obligations rated Ba are judged to be speculative and are subject to substantial credit risk.

B

Obligations rated B are considered speculative and are subject to high credit risk.

Caa

Obligations rated Caa are judged to be speculative of poor standing and are subject to very high credit risk.

Ca

Obligations rated Ca are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.

C

Obligations rated C are the lowest rated and are typically in default, with little prospect for recovery of principal or interest.

Note: Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category. Additionally, a "(hyb)" indicator is appended to all ratings of hybrid securities issued by banks, insurers, finance companies, and securities firms.*

* By their terms, hybrid securities allow for the omission of scheduled dividends, interest, or principal payments, which can potentially result in impairment if such an omission occurs. Hybrid securities may also be subject to contractually allowable write-downs of principal that could result in impairment. Together with the hybrid indicator, the long-term obligation rating assigned to a hybrid security is an expression of the relative credit risk associated with that security.

Fitch's National Long-Term Credit Ratings

AAA(xxx)

'AAA' National Ratings denote the highest rating assigned by the agency in its National Rating scale for that country. This rating is assigned to issuers or obligations with the lowest expectation of default risk relative to all other issuers or obligations in the same country.

AA(xxx)

'AA' National Ratings denote expectations of very low default risk relative to other issuers or obligations in the same country. The default risk inherent differs only slightly from that of the country's highest rated issuers or obligations.

A(xxx)

'A' National Ratings denote expectations of low default risk relative to other issuers or obligations in the same country. However, changes in circumstances or economic conditions may affect the capacity for timely repayment to a greater degree than is the case for financial commitments denoted by a higher rated category.

BBB(xxx)

'BBB' National Ratings denote a moderate default risk relative to other issuers or obligations in the same country. However, changes in circumstances or economic conditions are more likely to affect the capacity for timely repayment than is the case for financial commitments denoted by a higher rated category.

BB(xxx)

'BB' National Ratings denote an elevated default risk relative to other issuers or obligations in the same country. Within the context of the country, payment is uncertain to some degree and capacity for timely repayment remains more vulnerable to adverse economic change over time.

B(xxx)

'B' National Ratings denote a significantly elevated default risk relative to other issuers or obligations in the same country. Financial commitments are currently being met, but a limited margin of safety remains and capacity for continued timely payments is contingent upon a sustained, favorable business and economic environment.

CCC(xxx)

'CCC' National Ratings denote very high default risk relative to other issuers or obligations in the same country.

CC(xxx)

'CC' National Ratings denote default risk is among the highest relative to other issuers or obligations in the same country.

C(xxx)

A default or default-like process has begun, or the issuer is in standstill, or for a closed funding vehicle, payment capacity is irrevocably impaired. Conditions that are indicative of a 'C' category rating for an issuer include:

- a. the issuer has entered into a grace or cure period following non-payment of a material financial obligation;
- b. the issuer has entered into a temporary negotiated waiver or standstill agreement following a payment default on a material financial obligation;
- c. the formal announcement by the issuer or their agent of a distressed debt exchange; and
- d. a closed financing vehicle where payment capacity is irrevocably impaired such that it is not expected to pay interest and/or principal in full during the life of the transaction, but where no payment default is imminent.

RD(xxx): Restricted default.

'RD' ratings indicate an issuer that, in Fitch's opinion, has experienced an uncured payment default on a bond, loan or other material financial obligation but that has not entered into bankruptcy filings, administration, receivership, liquidation or other formal winding-up procedure and has not otherwise ceased business. This would include:

- a. the selective payment default on a specific class or currency of debt;
- b. the uncured expiry of any applicable grace period, cure period or default forbearance period following a payment default on a bank loan, capital markets security or other material financial obligation;
- c. the extension of multiple waivers or forbearance periods upon a payment default on one or more material financial obligations, either in series or in parallel; or
- d. execution of a distressed debt exchange on one or more material financial obligations.

D(xxx)

'D' National Ratings denote an issuer or instrument that is currently in default.

Notes to Long-Term and Short-Term National Ratings:

The ISO International Country Code is placed in parentheses immediately following the rating letters to indicate the identity of the National market within which the rating applies. For illustrative purposes, (xxx) has been used.

MUNICIPAL NOTE RATINGS

S&P's Municipal Short-Term Note Ratings Definitions

An S&P Global Ratings U.S. municipal note rating reflects S&P Global Ratings' opinion about the liquidity factors and market access risks unique to the notes. Notes due in three years or less will likely receive a note rating. Notes with an original maturity of more than three years will most likely receive a long-term debt rating. In determining which type of rating, if any, to assign, S&P Global Ratings' analysis will review the following considerations:

- Amortization schedule--the larger the final maturity relative to other maturities, the more likely it will be treated as a note; and
- Source of payment--the more dependent the issue is on the market for its refinancing, the more likely it will be treated as a note.

Note rating symbols are as follows:

SP-1

Strong capacity to pay principal and interest. An issue determined to possess a very strong capacity to pay debt service is given a plus (+) designation.

SP-2

Satisfactory capacity to pay principal and interest, with some vulnerability to adverse financial and economic changes over the term of the notes.

SP-3

Speculative capacity to pay principal and interest.

See active and inactive qualifiers following S&P Short-Term Issue Credit Ratings beginning on page 46.

Moody's US Municipal Short-Term Debt And Demand Obligation Ratings

Short-Term Obligation Ratings

The Municipal Investment Grade (MIG) scale is used to rate US municipal bond anticipation notes of up to three years maturity. Municipal notes rated on the MIG scale may be secured by either pledged revenues or proceeds of a take-out financing received prior to note maturity. MIG ratings expire at the maturity of the obligation, and the issuer's long-term rating is only one consideration in assigning the MIG rating. MIG ratings are divided into three levels—MIG 1 through MIG 3—while speculative grade short-term obligations are designated SG.

MIG 1

This designation denotes superior credit quality. Excellent protection is afforded by established cash flows, highly reliable liquidity support, or demonstrated broad-based access to the market for refinancing.

MIG 2

This designation denotes strong credit quality. Margins of protection are ample, although not as large as in the preceding group.

MIG 3

This designation denotes acceptable credit quality. Liquidity and cash-flow protection may be narrow, and market access for refinancing is likely to be less well-established.

SG

This designation denotes speculative-grade credit quality. Debt instruments in this category may lack sufficient margins of protection.

Demand Obligation Ratings

In the case of variable rate demand obligations (VRDOs), a two-component rating is assigned: a long or short-term debt rating and a demand obligation rating. The first element represents Moody's evaluation of risk associated with scheduled principal and interest payments. The second element represents Moody's evaluation of risk associated with the ability to receive purchase price upon demand ("demand feature").

The second element uses a rating from a variation of the MIG scale called the Variable Municipal Investment Grade (VMIG) scale. VMIG ratings of demand obligations with unconditional liquidity support are mapped from the short-term debt rating (or counterparty assessment) of the support provider, or the underlying obligor in the absence of third party liquidity support, with VMIG 1 corresponding to P-1, VMIG 2 to P-2, VMIG 3 to P-3 and SG to not prime. For example, the VMIG rating for an industrial revenue bond with Company XYZ as the underlying obligor would normally have the same numerical modifier as Company XYZ's prime rating. Transitions of VMIG ratings of demand obligations with conditional liquidity support, as shown in the diagram below, differ from transitions on the Prime scale to reflect the risk that external liquidity support will terminate if the issuer's long-term rating drops below investment grade.

VMIG 1

This designation denotes superior credit quality. Excellent protection is afforded by the superior short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 2

This designation denotes strong credit quality. Good protection is afforded by the strong short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

VMIG 3

This designation denotes acceptable credit quality. Adequate protection is afforded by the satisfactory short-term credit strength of the liquidity provider and structural and legal protections that ensure the timely payment of purchase price upon demand.

SG

This designation denotes speculative-grade credit quality. Demand features rated in this category may be supported by a liquidity provider that does not have an investment grade short-term rating or may lack the structural and/or legal protections necessary to ensure the timely payment of purchase price upon demand.

APPENDIX “B” Proxy Voting Policy

Proxy Voting Policy

1. General

As a fiduciary, an investment adviser with proxy voting authority has a duty to monitor corporate events and to vote proxies, as well as a duty to cast votes in the best interest of clients and not subrogate client interests to its own interests. Rule 206(4)-6 under the Advisers Act (the “Proxy Voting Rule”) places specific requirements on registered investment advisers with proxy voting authority. To meet the obligations under this rule, the Company has adopted and implemented policies and procedures (“Proxy Voting Policy”) reasonably designed to ensure the Company votes proxies in the best interest of its Clients and address how it will resolve any conflict of interest that may arise when voting proxies. Additionally, the Company will: (i) maintain certain records required to be maintained by the Proxy Voting Rule relating to all voted proxies; (ii) disclose its proxy voting policies and procedures to Clients and upon request providing Clients with a copy of it; and (iii) inform Clients as to how they can obtain information from the Company as to how their securities were voted.

The Company shall vote proxies solicited by or with respect to the issuers of securities in which assets of a Client portfolio are invested, unless: (i) the Client is subject to ERISA and the Advisory Contract between the Company and the Client expressly precludes the voting of proxies by the Company; (ii) the Client is not subject to ERISA and the Client otherwise instructs the Company; or (iii) the Company has responsibility for proxy voting and, in the Company’s judgment, the cost or disadvantages of voting the proxy would exceed the anticipated benefit to the Client. If the Client does not grant direct voting authority to the Company, Clients will not receive information about their proxies from the Company. Instead, Clients will be instructed to receive proxies from their custodian, transfer agent or other third-party service providers such as their proxy service provider.

2. Primary Consideration in Voting

When the Company votes a Client’s proxy with respect to a specific issuer, a Client’s economic interest as a shareholder of that issuer is the Company’s primary consideration in determining how proxies should be voted. The Company will not consider interests of the Company, other stakeholders of the issuer or interests the Client may have in other capacities. The Company shall vote proxies with the goal of maximizing the value of the securities in Client portfolios.

3. Engagement of Service Provider

The Company may engage one or more independent third-party proxy advisory firms (“Proxy Firm”) to (i) make recommendations to the Company of proxy voting policies for adoption by the Company; (ii) perform research and make recommendations to the Company as to particular shareholder votes being solicited; (iii) perform the administrative tasks of receiving proxies and proxy statements, marking proxies as instructed by the Company and delivering those proxies; (iv) retain proxy voting records and information; and (v) report to the Company on its activities. In no circumstances shall a Proxy Firm have the authority to vote proxies except in accordance with standing or specific instructions given to it by the Company. The Company shall retain final authority and fiduciary responsibility for the voting of proxies.

4. Proxy Voting Guidelines

The Company’s proxy voting guidelines are both principles-based and rules-based. The Company adheres to a core set of principles that are described in this Proxy Voting Policy and assesses each proxy proposal in light of these principles. The Company’s proxy voting “litmus test” will always be what it views as most

likely to maximize long-term shareholder value. The Company believes that the authority and accountability for setting and executing corporate policies, goals and compensation generally should rest with the board of directors and senior management. In return, the Company supports strong investor rights that allow shareholders to hold directors and management accountable if they fail to act in the best interests of shareholders.

Generally, the Company votes proposals in accordance with these guidelines but, consistent with its “principles-based” approach to proxy voting, the Company may deviate from the guidelines if warranted by the specific facts and circumstances of the situation (i.e., if, under the circumstances, the Company believes that deviating from its stated policy is necessary to help maximize long-term shareholder value). In addition, these guidelines are not intended to address all issues that may appear on all proxy ballots. The Company will evaluate on a case-by-case basis any proposal not specifically addressed by these guidelines, whether submitted by management or shareholders, always keeping in mind the Company’s fiduciary duty to make voting decisions that, by maximizing long-term shareholder value, are in the Clients’ best interests. The proxy voting guidelines provide that the Company will generally vote for or against various proxy proposals, usually based upon certain specified criteria. As an example, the guidelines provide that the Company will generally vote in favor of proposals to:

- Repeal existing classified boards and elect directors on an annual basis;
- Adopt a written majority voting or withhold policy (in situations in which a company has not previously adopted such a policy);
- Lower supermajority shareholder vote requirements for charter and bylaw amendments;
- Lower supermajority shareholder vote requirements for mergers and other business combinations;
- Increase common share authorizations for a stock split;
- Implement a reverse stock split;
- Approve an ESOP (employee stock ownership plan) or other broad-based employee stock purchase or ownership plan, or increase authorized shares for existing plans; and
- Adopt certain social and environmental issues regarding discrimination, disclosures of environmental impact, animal treatment and corporate sustainability, when appropriate.

The proxy voting guidelines also provide that the Company will generally vote against proposals to:

- Elect director nominees that sit on more than six public company boards, or, if the nominee is a CEO, more than three public company boards;
- Classify the board of directors;
- Require that poison pill plans be submitted for shareholder ratification;
- Adopt dual class exchange offers or dual class recapitalizations;
- Require a supermajority shareholder vote to approve mergers and other significant business combinations;
- Require a supermajority shareholder vote to approve charter and bylaw amendments; and
- Adopt certain social and environmental proposals deemed unwarranted by the company’s board of directors.

In certain circumstances, the guidelines provide that proxy proposals will be addressed on a case-by-case basis, including those regarding executive and director compensation plans, mergers and acquisitions, ratification of poison pill plans, a change in the company’s state of incorporation and an increase in authorized common stock.

The Company may vote proxies contrary to the recommendations of the Proxy Firm if it determines that such action is in the best interest of a Client. In exercising its discretion, the Company may take into account a wide array of factors relating to the matter under consideration, the nature of the proposal and the company involved. As a result, the Company may vote in one manner in the case of one company and in a different manner in the case of another where, for example, the past history of the company, the character and integrity of its management, the role of outside directors, and the company's record of producing performance for investors justifies a high degree of confidence in the company and the effect of the proposal on the value of the investment. Similarly, poor past performance, uncertainties about management and future directions, and other factors may lead the Company to conclude that particular proposals present unacceptable investment risks and should not be supported. In addition, the Company also evaluates proposals in context. For example, a particular proposal may be acceptable standing alone, but objectionable when part of an existing or proposed package. Special circumstances may also justify casting different votes for different Clients with respect to the same proxy vote.

5. Conflicts of Interest

Conflicts of interest involved in a proxy vote shall be addressed through the following three-step process:

i. Identification of all potential conflicts of interest

The Company will be deemed to have a potential conflict of interest when voting proxies if:

- The Company manages assets for that issuer or an affiliate of the issuer and also recommends that its other Clients invest in such issuer's securities;
- A director, trustee, officer or 10% shareholder of the issuer or an affiliate of the issuer is a director of a Client, a Client or an employee of the Company;
- The Company is actively soliciting that issuer or an affiliate of the issuer as a Client;
- Clients who sponsor, publicly support or have material interest in a proposal upon which the Company will be eligible to vote;
- The Company manages a pension plan, employee benefit plans, or provides brokerage, underwriting, insurance, or banking services to an issuer whose management is soliciting proxies;
- The Company or an affiliate has a substantial business relationship (separate from the Company's investment strategy) with an issuer or a proponent of a proxy proposal and this business relationship may influence how the proxy vote is cast;
- The Company or an affiliate has a business relationship (separate from the Company's investment strategy) or personal relationship with participants in a proxy contest, corporate directors or candidates for directorships;
- An officer or Employee of the Company or an affiliate may have a familial relationship to an issuer (e.g. a spouse or other relative who serves as a director of an issuer);
- A director or executive officer of the issuer has a personal relationship with the Company;
- Another relationship or interest of the Company, or an Employee of the Company, exists that may be affected by the outcome of the proxy vote and that the Company deems to be an actual or potential conflict for the purposes of this Proxy Voting Policy; or
- Any other conflict of which the Company becomes aware.

Each Employee who is a member of the investment team that recommends votes or serves on the Investment Committee shall, on at least an annual basis, provide to the CCO a list of any public companies with or in which he or she has a relationship or could otherwise be deemed to have a conflict. Each such

Employee shall also certify to the Company at least annually that he or she agrees to update such list promptly upon becoming aware of any relationship, interest or conflict other than what he or she originally disclosed.

ii. Determination of material conflicts

The SEC has not provided any specific guidance as to how an investment adviser should analyze or determine whether a conflict is “material” for purposes of proxy voting. Thus, traditional analysis of questions of materiality under the federal securities laws should be used.

When the Company encounters a potential conflict of interest, it shall review its proposed vote using the following analysis to ensure its voting decision does not generate a conflict of interest:

- If the proposed vote is consistent with the Company’s Proxy Voting Policy, no further review is necessary.
- If the proposed vote is contrary to the Company’s Proxy Voting Policy and the Client’s position on the proposal, no further review is necessary.
- If the proposed vote is contrary to the Company’s Proxy Voting Policy or is not covered herein, is consistent with the Client’s position, and is also consistent with the views of the Proxy Firm, no further review is necessary.
- If the proposed vote is contrary to the Company’s Proxy Voting Policy or is not covered herein, is consistent with the Client’s position and is contrary to the views of the Proxy Firm, the vote will be presented to the CCO. The CCO will determine whether the proposed vote is reasonable. If the CCO cannot determine that the proposed vote is reasonable, the CCO may refer the votes back to the Client(s) or take other actions as the CCO deems appropriate. The CCO’s review will be documented using a Proxy Voting Conflict of Interest Form, which is attached hereto as Exhibit V.

iii. Establishment of procedures to address material conflicts

If a material conflict of interest with respect to a particular vote is encountered, contact the CCO to determine how to vote the proxy consistent with the best interests of a Client and in a manner not affected by any conflicts of interest.

6. Recordkeeping

Pursuant to Rule 204-2, the Company shall retain the following five (5) types of records relating to proxy voting: (i) proxy voting policy and procedures; (ii) proxy statements received for Client securities; (iii) records of votes cast on behalf of Clients; (iv) written Client requests for proxy voting information and written Company responses to any Client request (whether oral or written) for proxy voting information; and (v) any documents prepared by the Company that were material to making a proxy voting decision or that memorialized the basis for the decision. All of the proxy voting records referenced herein above shall be maintained by the CCO for a period of not less than seven (7) years from the end of the Company’s fiscal year during which the last entry was made in the records, the first two (2) years in an appropriate office of the Company.

7. Policy Statement and Requests

The Company shall make a summary of this Proxy Voting Policy available to Clients on at least an annual basis. Such summary will be contained in the Company’s Form ADV Brochure. The Company shall also make the entire Proxy Voting Policy and the Company’s proxy voting records with respect to a Client’s account available to that Client or its representatives for review and discussion upon the Client’s request or as may be required by applicable law. The Company generally will not disclose publicly its past votes, share amounts voted or held or how it intends to vote on behalf of a Client account except as required by

applicable law, but may disclose such information to a Client who itself may decide or may be required to make public such information. Upon a request from a person other than a Client for information on the Company's proxy voting, Company personnel are prohibited from disclosing such information unless otherwise directed to do so by a Client, in which case Company personnel shall direct the requesting party to the CCO who will handle the request.

Questions related to this Proxy Voting Policy, the proxy voting process and/or information regarding how the Company voted proxies relating to a Client's portfolio of securities may be obtained by Clients, free of charge, by contacting the CCO at (737) 808-4637 or cfava@innealtacapital.com.
